First Auburn-Bama Game at AU Gets Smash Reviews, Tigers Win 30-20

If Jeff Beard, the late Shug Jordan '32, Hindman Wall '58, and Pat Dye could have gotten together and written the script, the first Auburn-Alabama varsity football game ever played in Auburn could not have gone much better than it did on Dec. 2.

The past and present Auburn football coaches and administrators are just a few of the many who were instrumental in the long struggle to put the historic series on a home and home basis, culminating in the agreement which brought the Crimson Tide to Jordan-Hare Stadium for the first time this year—96 years after the series' first game was played in Birmingham in 1893.

Auburn's biggest weekend ever officially began with a "Beat Bama" parade through town and campus on Friday afternoon and officially ended with a scintillating 30-20 Tiger win over the previously undefeated and second-ranked Tide in Jordan-Hare Stadium Saturday. (More Auburn-Alabama coverage on pages 2, 4, 5, and 26.) The unofficial celebration began much earlier and continued much later, as the first recreational vehicles began pulling into town as early as Tuesday on game week, and the post-game celebration at Toomer's Corner and around campus continued late into the night and on into the morning following the big Auburn win.

All week long prior to the game, Auburn Head Coach Pat Dye told anyone who would listen that the biggest thing about the game was its coming to Auburn for the first time—not who won or lost. But he had a tough time selling fans of both schools on that idea, especially Tiger boosters who couldn't bear the thought of finally getting the Tide in Jordan-Hare only to lose the inaugural contest. The stakes were equally high for Bama boosters, as the Tide approached the game with a chance to not only beat Auburn on its own turf, but also to wrap up an undefeated season, sole possession of the SEC title, and a strong shot at a national championship should they defeat Miami in the Sugar Bowl.

TOTALLY AUSOME—The Jordan-Hare Stadium scoreboard tells the tale of the Alabama Crimson Tide's long-awaited visit to Auburn to play the annual Tiger-Tide football game. It took 96 years from the time the first game was played, but Auburn finally got to play its first home game in the series on Dec. 2. The Tigers made the most of the opportunity, beating the second-ranked, previously undefeated, and Sugar-Bowl-bound Tide 30-20 to take a share of their third consecutive SEC title and make a trip to Tampa's Hall of Fame Bowl sweeter than sugar.

—Photo by AU Photo Services

The major vanguard of the record-setting crowd that would descend on Auburn Saturday for the game arrived on Friday, as 10-12,000 fans came early for a number of pre-game festivities on campus and in town. Many came in motor homes, but others brought tents or sleeping bags, and one group was even observed setting up temporary housekeeping in a U-Haul truck parked almost within the shadow of the stadium.

Following the "Beat Bama" parade, a crowd of several thousand packed Plainsman Park for a pep rally featuring Coach Dye and some of the players, Aubie and the cheerleaders, the Auburn band, and an impromptu beauty pageant conducted by nationally known speaker and humorist Jeanne Swanner Robertson '72.

From the pep rally, it was on to Eaves-Memorial Coliseum, where Coach Tommy Joe Eagles' basketball Tigers hosted the UAB Blazers in the annual renewal of another athletic contest previously always played in Birmingham. Auburn came out on the short end of an 85-75 score, but nothing could

dampen the spirits of most Tiger fans on this weekend. Following the game, the majority of the crowd once again moved to Plainsman Park, where a fireworks display and a concert by "The Drifters" closed out the evening's festivities.

Saturday morning's activities got off to an early start with the dedication of a bronze sculpture of the War Eagle in flight, located in front of the coliseum and donated by a group of alumni led by Lewis White '48 of Mountain Brook. The eagle was sculpted by nationally

Busta Named VP for Advancement

Joseph F. Busta, Jr. '69, Vice President for Development and Alumni Affairs at the University of South Florida, has been named Vice President for Advancement at Auburn University, according to President James E. Martin '54. Dr. Busta will officially assume his new duties on or before July 1, 1990, but will spend a few days each month in Auburn prior to that time.

"The university was very fortunate to recruit one of the country's finest and best qualified young men to lead our alumni and development pro-

gram," stated Dr. Martin. "Joe Busta will bring the kind of experience and leadership we need to these important areas of the university."

Dr. Martin said Dr. Busta was the unanimous choice of the selection committee composed of Ruel Russell, president of the Auburn Alumni Association; Gilmer Blackburn, president of the Auburn University Foundation; and himself.

"We regret very much that Joe is leaving the university," stated University of South Florida President Francis (Continued on page 2)

known artist Jack Hucks of Huntsville and the supporting column was designed by John E. Davis '39, who died only days before the ceremony.

After the dedication, a huge crowd of orange-and-blue-clad fans gathered for the "Tiger Walk," where the players walk from the athletic dormitory to the stadium to dress out for the game. In some places along the Donahue Drive route, supporters were 16-deep on both sides of the street, forcing the players to move through the cheering throng in single-file. Several Tiger seniors said the experience of this "Tiger Walk" was the greatest of their Auburn careers.

In a departure from previous Tiger home games, the stadium was absolutely packed more than one hour before the game with an overflow crowd of 85,319—the largest crowd ever to see a football game in the state of Alabama. Ticket scalpers, who earlier had been selling tickets for as much as \$500 per pair, suddenly found themselves with few takers. Many fans without tickets adjourned to local restaurants or to Memorial Coliseum to watch the game on television, while others in cars and recreational vehicles plugged televisions into whatever power source they could find to tune in to the CBS broadcast of the contest.

The continual roar of the partisan Auburn crowd in the stadium had long-time Tiger observers searching for comparisons, but there were few to be found. Despite trailing 10-7 at the break, Auburn dominated the second half, outscoring the Tide 23 to 10 down the stretch for the 30-20 final. Following the Tigers' victory, most Auburn fans remained in the stands, cheering and dancing to the strains of "Louie, Louie" as the band played on long after the game. The celebration continued at Toomer's Corner, where a huge crowd rolled not only the corner, but the trees and lightposts for a block in all directions as well.

Thanks to careful planning and preparation by city and university officials, there were few incidents marring the historic occasion, despite the emotions flowing on both sides and fears among some observers that Auburn could not host the game effectively. Those fears proved unfounded on a weekend that will forever live in Auburn history and in the memories of Tiger supporters everywhere.

"Auburn fans have been waiting for this day so long," said All-SEC linebacker Quentin Riggins, one of the team's leaders on defense, in summing up Alabama's first visit to the plains. "The hype didn't put any extra pressure on us; it was more of an incentive. We knew how much it meant to everyone and we wanted to win it for the fans. You could see it before the game, during the game, and when it was over. This was just a great day for Auburn."

Joe Busta Named VP For Advancement

(Continued from page 1)

T. Borkowski. "He has been a part of our organization for 18 years and has

NEW ALUMNI & DEVELOPMENT HEAD—President James E. Martin '54, left, recently met with Joseph F. Busta, Jr., '69, who has been named Auburn's new Vice President for Advancement to head up the Alumni & Development Office. Dr. Busta, presently Vice President for Development and Alumni Affairs at the University of South Florida in Tampa, should assume his new post on or before July 1.

—Photo by AU Photo Services

made major contributions in the development of this institution."

Dr. Busta received his Bachelor of Science degree in pre-law from Auburn in 1969. He was president of the interfraternity council, a member of Spades, president of Delta Chi fraternity, and a student government senator. He received his master's degree from the University of Tennessee and a doctorate in higher education from the University of Florida in 1978.

Dr. Martin said that Dr. Busta has also served as executive vice president of the University of South Florida Foundation, where he is completing a \$111 million capital gifts campaign.

Dr. Busta started his career as adviser to fraternities at the University of Tennessee in 1969. He was named director of student organizations at the University of South Florida in 1971. In 1973, he became assistant to the president and served as acting director of university relations from 1977-79.

In 1979, he became vice president for university relations and executive director of the University of South Florida Foundation. Dr. Busta assumed his present title in 1985.

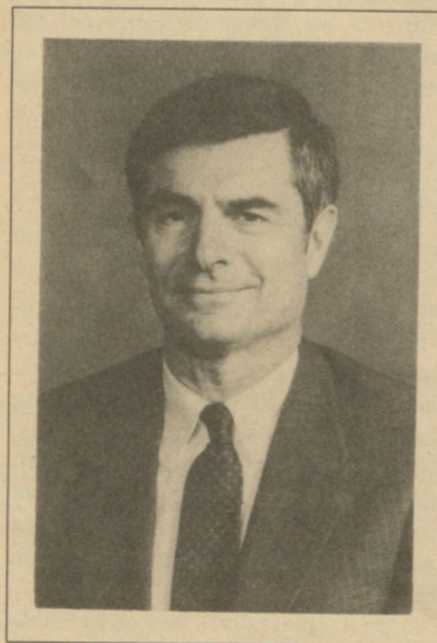

Dr. Busta is a former member of the Board of Governors of the Tampa Chamber of Commerce and the Tampa General Hospital Foundation Board of Trustees. He is currently a member of the Mayor's International Trade Fair Advisory Committee, the Tampa Club, the Florida Bar Grievance Committee, and the Florida Aquarium Board of Trustees. He is currently serving as Chairman of the Council on University Relations and Development of the National Association of State Universities and Land Grant Colleges and also serves on the executive committee of that organization. He was also named an Outstanding Young Man of America in 1975.

Perot Makes Gift Of \$2.6 Million To Honor Walter

Auburn has received a grant of \$2.6 million from Texas businessman Ross Perot in honor of his friend and long-time business associate, Tom Walter, a 1955 Auburn engineering physics graduate.

The gift will be used to create the National Consortium for Technology in Business, which will be based in Auburn's newly established Thomas Walter Center for Technology Management. The purpose of the new center is to build bridges between the engineering and business professions in the application and management of technology.

Programs in the center will include research, education, and outreach

Thomas Walter '55

related to technology management and will bring together businessmen, engineers, and college faculty to find ways to make the U.S. more competitive in the global market. A portion of the gift will also be used to endow an eminent scholar chair in technology management.

"This gift provides us with the opportunity to honor one of our most distinguished alumni," said President James E. Martin '54. "Tom Walter figures prominently in the development of this program."

Mr. Walter, a Selma native, graduated from Sidney Lanier High School in Montgomery in 1951. He entered Auburn on a Naval Reserve Officer Training Corps scholarship and graduated with a degree in engineering physics. After completing a four-year tour of duty in the Navy, Mr. Walter served in engineering positions with Texas Instruments and IBM. In 1963 he joined the Dallas-based Electronic Data Systems Corporation (EDS), a newly formed company founded by Mr. Perot.

One of the principal builders of EDS, Mr. Walter has served as director and chief financial officer. In 1984, EDS became a subsidiary of General Motors Corporation, and Mr. Walter remained with the firm until 1986. Since then, he and Mr. Perot have continued to be business associates.

Mr. Walter and his wife, Jean Hall Walter '57, endowed the James H. Hall Scholarship in Agriculture in 1974, in honor of Mrs. Walter's father, and the Thomas and Jean Walter Scholarship in Physics in 1985. Mr. Walter also serves on the Auburn University Foundation board and is a member of its investment committee.

Hughes Re-elected, Fickling Elected to Foundation Board

Brigadier General Joseph D. Hughes '31 (retired) was re-elected to another term and William A. Fickling, Jr., '54 was elected to his first term on the Auburn University Foundation board of directors during the board's meeting at the Auburn Alumni Center Nov. 3.

While at Auburn, Gen. Hughes was a member of Sigma Phi Epsilon fraternity and a three-time letterman on the varsity track team, earning All-Southern-Conference honors in 1930. After graduation with a bachelor's degree in business administration, Gen. Hughes received his law degree from George Washington University in 1934. He served with a number of government agencies including the Departments of State, Treasury, and Internal Revenue, before retiring as vice president of Richard K. Mellon and Sons in Pittsburgh in 1971.

A founding member of the Auburn University Foundation, Gen. Hughes holds an honorary doctorate from Auburn and served on the Auburn Generations Fund National Campaign Committee. He also holds honorary doctorates from Waynesburg College and Theil College, and he received the Alumni Achievement Award from George Washington University in 1965.

He and his wife, Jane, live in Pittsburgh and have three sons: Thomas, Gordon, and Gerard.

Mr. Fickling is president, chairman, and CEO of Charter Medical Corporation in Macon, Ga., and owner of Georgia Timberlands, Inc. He earned his bachelor's in business administration from Auburn, where he was a member of the basketball team, Kappa Alpha fraternity, Delta Sigma Pi, Phi Kappa Phi, Phi Eta Sigma, and the "A" Club, Squires, and Arnold Air Society. He has remained active at Auburn, serving as a member of the Auburn Generations Fund National Campaign Committee and the College of Business Advisory Council. He also received the college's Distinguished Alumnus Award in 1980 and the university's Walter Gilbert Award for achievement by former athletes in 1985.

Mr. Fickling serves as a director on a number of boards, including those of Georgia Power Company, C&S National Bank, Southern Georgia Railway Company, and Citizens and Southern Georgia Corporation. He also serves on the Macon Board of Realtors and as a trustee of Wesleyan College. He and his wife, Neva Jane, live in Macon and have four children: Jane, Julia, William, III, and Roy.

Kunkel Named New Dean of AU Education

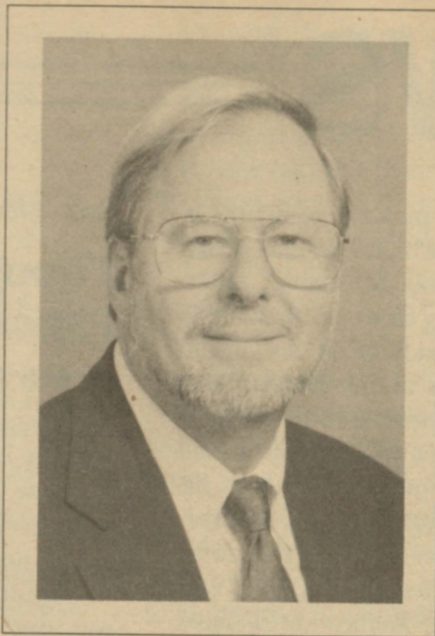

Richard C. Kunkel, former executive director of the only national accreditation agency for teacher education, is the new dean of the Auburn College of Education. Dr. Kunkel assumed the post on Jan. 1.

"Richard Kunkel will bring to our College of Education a great deal of experience as well as a proven record as an administrator," said President James E. Martin '54. "We feel he is the best person to lead Auburn's efforts in educating our state and nation's teachers and school administrators."

For the past five years, Dr. Kunkel has led the Washington, D.C.-based National Council for the Accreditation of Teacher Education (NCATE). He joined the organization in 1984 as chief administrator and oversaw continuous site visitations to 552 higher education institutions, supervised development of new standards of accreditation, and established a new governance system for 23 national organizations.

Prior to joining NCATE, Dr. Kunkel served as dean and professor of the College of Education at the University of Nevada-Las Vegas from 1978 to 1984, chairman of the Department of Education at Saint Louis University from 1972 to 1978, and associate professor of education at Ball State University from 1968 to 1972.

Dr. Kunkel holds a bachelor's degree in education from Northeast Missouri State University, an M.Ed. in administration and counseling from the University of Missouri, and a Ph.D. in administration and curriculum from Saint Louis University. He has authored or co-authored more than 35 articles in professional

Richard C. Kunkel

publications and conducted more than 200 educational evaluation studies for grades K-12, as well as university and professional school programs.

Trustees Okay New Residency Policies, Support Teaching

Meeting on campus October 27, the Auburn Board of Trustees adopted a revised policy regarding Alabama residency for tuition purposes and passed measures to maintain and recognize quality teaching, which it called "the foremost activity of the university."

Effective next fall, the new residency requirements define how Alabama residency is initially determined or later achieved. Currently, out-of-state students pay tuition at a rate three times higher than in-state students.

Under the current policy, a student may prove residency for tuition purposes by renting an apartment for 12 months, getting a bank account, registering to vote, and having an Alabama driver's license and license plates. Under the new, more stringent guidelines, a student must establish 12 months of residency by meeting a minimum of five of the following eight criteria: ownership of property or rental of property for one year, full-time employment in Alabama, possession of a state business or professional license, marriage to an Alabama resident, voter registration, filing Alabama tax returns, possession of an Alabama driver's license, or validating Alabama vehicle registration and tax payment.

The new policy assumes that a person under age 19 who comes from out-of-state is primarily at Auburn for an education, and one must reach age 19 before establishing residency.

The board also passed a resolution citing instruction as the primary mission of the university and outlining ways to maintain teaching quality. The resolution calls for class sizes and faculty teaching loads to be conducive to individual student attention, and that top faculty members teach at lower undergraduate levels so that all students may benefit. The resolution also urges that those who teach possess strong communication skills, and that a "learning center" be created to assist faculty

members in improving such skills. It further provides that teaching performance be regularly evaluated by students, peers, and administrators so that outstanding teaching can be recognized and rewarded.

In other action, the board named an architect for the \$10.6 million Chemistry Building II, approved a resolution thanking Coach Pat Dye and the Athletic Department for providing \$370,228 from 1988 football ticket proceeds for Auburn's academic programs, and approved a new policy regarding the awarding of honorary degrees.

AU's Tag Sales Top \$204,000

Now entering its second year, Auburn's "License to Learn" vanity tag program brought in \$204,949 in support for academic scholarships through the end of October 1989. The month marked the best for tag sales to date, with 589 tags purchased across the state, bringing \$28,714 into the Auburn scholarship endowment.

The Alabama vanity tag program allows state residents to purchase special license plates displaying the colors and logo of their favorite college or university. The cost is \$50 per year beyond the regular tag fee, with all but a small

processing fee going to each school's scholarship endowment. Tags are sold in each county probate judge's office and may be purchased any time.

Three entering freshmen—Jeff Baumbach of Huntsville, Steve Beaty of Trussville, and Meredith Bell of Montgomery—have already received scholarships from Auburn's fund.

A-Day's Support to Library at \$69,260

For the eighth straight year, profits from Auburn's spring A-Day football game have been distributed by the Athletic Department to the Ralph Brown Draughon Library, the Auburn University Band, and the A-Club. Each of the areas received \$3,871 for 1989, with the library's share bringing its total in the eight years since Athletic Director and Head Football Coach Pat Dye initiated the program to \$69,260.

Since 1981, the library has purchased 2,310 books with its share of the A-Day funds, according to University Librarian William C. Highfill. Other Athletic Department support for university academic programs includes a \$1 million gift toward the ongoing library expansion and renovation project as well as \$370,000 recently donated from last year's football ticket sales to support scholarships and faculty development.

Letters to the Editor

Fan Says Students Should Behave

Editor, *The Alumnews*:

As an avid supporter of Auburn University, both in academics and athletics, I am appalled at what has been happening in our student sections at recent football games. Booing Auburn players and throwing cups on the field are behaviors that have been foreign to Auburn fans.

I have always been proud to tell anyone I am an Auburn fan, win or lose, and sportsmanship is number one at Auburn. Let's not be like some other Southeastern Conference schools.

War Eagle!

Lynda C. Cook '60
Warwick, Ga.

Where's AU Spirit?

Dear *Alumnews*:

Where is the Auburn spirit? I attended the Auburn-Florida game and could not believe that our own fans were booing Auburn! Or course, after the winning touchdown, no one was booing. We don't need fickle fans. When I was in school in the late '70s, I don't remember us even booing the opponent, and we certainly NEVER booed our own team. We've always

been known as good fans who stand behind Auburn no matter what. Well, what's happened to us?

You may not agree with everything that goes on on the field. I don't either, but discuss it among your friends and give the team your support. If you feel the need to boo Auburn, stay home and do it in your living room. Stop giving those of us who really love Auburn a bad name.

Let's get that Auburn spirit back like it's supposed to be.

Lisa Bridges '80
Atlanta, Ga.

Grounded Eagle

Editor, *The Alumnews*:

As an 88-year-old, I want to thank you for your coverage of the Golden Eagles Reunion in the November-December issue.

I am an Auburn Golden Eagle living at Wesley Terrace nursing home. I do not always have transportation to events. I did so want to come to the Auburn Golden Eagle luncheon—where three of my long-time friends had reached Golden Eagle status—but I had no way to get there. Thanks to the *Alumnews*, I was able to read about it instead.

Thanks again!

Mildred Lee Sanders Williamson '30
Auburn

POINTS & VIEWS

Here and There—

A Notable Event

By Jerry Roden, Jr., '46

Among the notable events at Auburn in the fall of 1989 was the release of *Last Things*, a novel by Madison Jones, published by the Louisiana State

RODEN

University Press. To place this event in its proper context, we need to review its particular background. Madison Jones, a native of Nashville, Tennessee, joined the English Department of Auburn University in September 1956 as an assistant professor of English and writer-in-residence. He came to Auburn after completing undergraduate studies at Vanderbilt University and graduate work at the University of Florida and after teaching at Miami University of Ohio and the University of Tennessee.

When Madison came to Auburn, his first novel, *The Innocent*, was in the hands of its publisher. It was issued in the winter of 1957 and was followed by *Forest of the Night* in 1960, *A Buried Land* in 1963, *An Exile* in 1967, *A Cry of Absence* in 1971, *Passage Through Gehenna* in 1978, and *Season of the Strangler* in 1982.

During the years when he was producing most of his novels, Madison also was teaching creative writing quite actively to Auburn students. In 1987, he retired and became Professor of English Emeritus and University Writer-In-Residence Emeritus. Since retirement, Madison has continued to live and write at his home in Kuderna Acres just off Wire Road in Auburn. *Last Things* comes as the fruit of his final years of teaching and his first years of retirement. And thus, seven of Madison's eight substantial novels come from the creative labor of his Auburn residency. Madison Jones and his work in a special sense belong to Auburn and lend it a distinction which too many sons and daughters of Auburn overlook.

Last Things is admirably designed as an introductory novel for contemporary readers such as Auburn graduates: It is economical, fast paced, and suspense filled, relating every essential of the dramatic rise and tragic fall of Wendell Corbin in two hundred and six pages of compelling prose. It provides some penetrating insights into the activities of narcotics agents, drug dealers, and drug users. Once you have picked it up, you probably will not want to put it down—Without planning to do so, I read it from cover to cover in one sitting.

In other words, *Last Things* possesses at one level all the attributes of a good detective thriller. It deals with adultery, betrayal, corruption, deceit, illicit drugs, and murder. Yet, *Last Things* is far more than a superb piece of escape literature, and it is in many essential respects quite different from detective fiction. In this novel, we often are involved in questions of who did what, but always we are concerned even more deeply with the question of *why*. And even though crime abounds, we care far less about the detection and punishment of its perpetrators than we do about the sinful impulses which loose lawlessness upon the world and destroy the individual soul.

One of the marks of his mastery of fiction is the subtle manner through which Madison Jones directs his readers' attention to man's innate sinfulness and to the decaying fabric of our society. Rather than moralize or preach at us, he simply presents us dramatic stories about the rise and fall of well developed characters, and the forceful presentation raises the urgent moral implications in the reader's mind as he goes along or as he muses upon the story afterward. Of course, Madison's achievement is not quite as simple as the broad outline offered here suggests. But I will leave all the subtleties of technique I have discovered—and certainly all of those I have not yet descried—for the reader to discern, for one of the great pleasures of reading is that of deducing how the author performs his magic.

Of course, I am aware that a few readers of poetry and fiction tend to dislike discussion of technique, of levels of meaning, and of moral implications. To such readers, as well as all others, I recommend *Last Things*, for with or without analysis, the novel will, I believe, leave each reader an humbler and a wiser man.

No Verdict Yet—Television is a medium with wonderful educational potentialities that remain largely untapped. So far, I have been unable to decide whether television as now constituted is more harmful than helpful. For example, there can be little doubt that television has encouraged the rallies for freedom now transpiring across the earth. Yet, we have to wonder if the banality of most television programs has not helped seduce many of us away from deep reading, disciplined discussion, and hard thinking essential for making freedom something nobler than a simple exercise in hedonism.

Esoterica for Everyone—

Thoughts on Two Kinds of Paper

By Bob Sanders '52

Remind me, please, before Alabama plays Auburn in Auburn the next time, to buy some stock in Georgia-Pacific or Charmin or in some other company that makes toilet paper. I meant to, but just never got around to it.

I would estimate that enough of the fragile stuff was used at Toomer's Corner on the evening after the recent battle to supply the needs of a city the size of Birmingham for a month. The rolling of that historic spot after a victory has become rather a charming tradition. Messy to clean up, perhaps, but relatively harmless. Not nearly as dangerous as throwing corncocks or Sears Roebuck catalogs.

Another thing I should have bought stock in before the game is newspapers. A little background is in order. I have this system: I don't take an out-of-town newspaper. I buy a different one every day. I have this very strict schedule to which I religiously adhere. This day the *Alabama Journal*, next day the *Atlanta Constitution*, etc., right on through the *USA Today* and *The Wall Street Journal*. That way, over a period of time, I am exposed to all the different columnists, the different comic strips, the different sports writers, the different editorial slants, and what have you. It is a system I highly recommend, seeing as how most of us couldn't afford to take all the papers, and wouldn't have time to read them if we could.

Anyway, Sunday, December third, was my day for the *Atlanta* paper. I had already read every bit of news, every post-game comment, every thought, every prayer, every scintilla of informa-

LET THE CELEBRATION BEGIN—Auburn fans turned out in record numbers at Toomer's Corner following the Tigers' 30-20 win over the Crimson Tide. The celebration began immediately after the game and continued long into the night, leaving the corner and most of the campus wrapped in toilet paper.

—Photo by Mike Jernigan

tion about THE game that could be written, in *The Opelika-Auburn News*. But, glutton-like, I craved even more. I wanted to see what the sophisticated, cosmopolitan Atlanta writers had to say about it.

Pause for an aside: Karen Rosen, an Auburn girl (Mel's daughter), who works for the Atlanta papers, was in town the week before THE game, gathering background information and color. She went around town, chatting with old timers, stopping in at the *Opelika-Auburn News*, etc., just setting the stage. Some of her gathered comments were picked up by Finebaum of the *Post-Herald* and humorously translated out of context. Anyway, Karen wasn't allowed to cover THE game. She could not do it objectively, her bosses said. They sent her to the Florida-Florida State game, instead.

But back to my main theme. Late Sunday morning, I stopped by my favorite store to get some pills to dam a runny nose...and to pick up the Atlanta Sunday paper. "Er, where is the Atlanta paper," I asked the lady at the checkout counter, whereupon she busted out laughing hysterically. "Man, we ain't had any in since right after the doors opened at seven this morning. People were lined up when we opened the doors."

"Maybe I could get some quarters so I could try some newsstands..."

This time I thought she'd go into convulsions, rolling around on the floor and carrying on with laughter the way she was. Between gasps, she blurted that there wasn't a quarter in the house.

Not only did she not have an Atlanta paper. She also did not have a Birmingham or Columbus or Montgomery or Opelika-Auburn paper.

I hurried out. Surely some papers still existed, and surely there were quarters to be had somewhere. To Winn-Dixie. Nope. To Kroger's. Nope. To the Post Office, to Toomer's Corner, to the Village Mall. Same thing. Not a single state or Atlanta or Columbus paper in any box anywhere in the area. Nothing but some old *Wall Street Journals* and *USA Todays*. Well, there were a few copies of the *New York Times*, but I've seen the amount of coverage they give to Southern football, and while I do love the Sunday *New York Times* when its time comes around about every twelfth Sunday (especially if that's the week of the book review section), it was not what I was looking for on this particular Sunday.

As far as I know, that's a first. I've been buying papers on Sunday mornings since right after the printing press was invented, and I don't recall a time before when there was a complete sellout of all area Sunday papers.

I imagine a lot of circulation directors have been kicking themselves in appropriate places these past weeks for not anticipating such a demand. Judging from other paper seekers ("My daughter's picture was in the *News*, and I couldn't find one!"), I suspect the normal Sunday sales could have been doubled or tripled—over the number put out for sale, which was probably already considerably more than usual.

I've learned my lesson. The next time Auburn plays Alabama in Auburn for the very first time in history, I will get up very early the next morning to get a paper.

Bearing the Bama Burden

By Mike Jernigan '80

When the nation's press was howling about Nancy Reagan's use of star-gazing to set Ron's schedule back in 1988, I didn't join in the uproar.

So what if Nancy checked the president's biorhythms before summits and signings. So what if she called her astrologer to find out Ron's horoscope before sending him out each morning to do the nation's business. After all, Mr. Reagan did have control over the big one—the black box—WW III. It would have been too bad if he had pushed the button on a day when a simple check of his horoscope would have warned him "Stay in bed today. An irrational whim might lead you to bring on nuclear holocaust."

Besides, I understand how minor tears in the fabric of the space-time continuum can alter the great cosmic scheme of things and play havoc with the outcome of seemingly unrelated events.

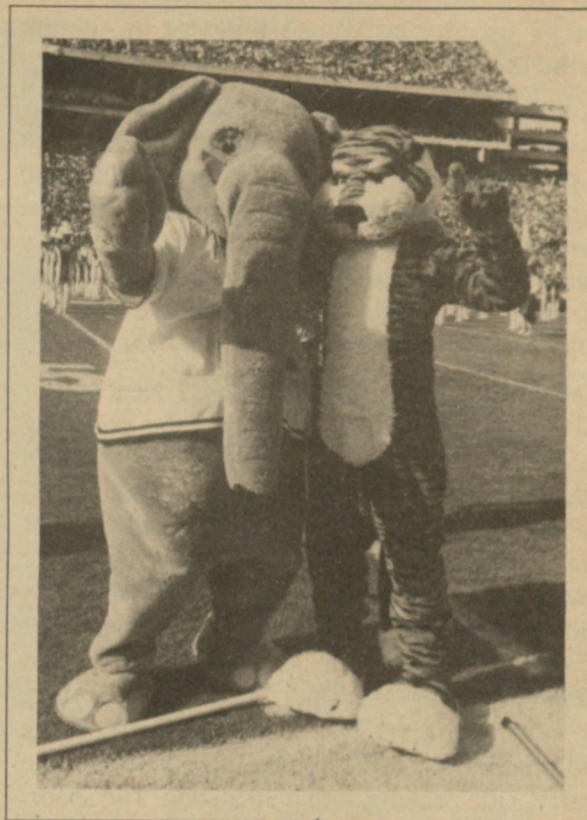

Take the Auburn-Alabama game for instance. It's a burden I have to live with, but I have come to realize that the rituals I go through before each game determine the final outcome. At first I refused to believe it, but independent testing by a team of leading palm-readers, psychics, gypsies, and *National Enquirer* reporters, along with further confirmation by a Ouija Board, have proved this a scientific fact.

My first inkling of this awesome responsibility came in 1977, as I attended my first Iron Bowl in person and watched Auburn take their annual pounding at the hands of the awesome Tide. Shivering in the unseasonable cold, my date turned to me and said, "If you hadn't insisted that we come up here to Birmingham and sit in this icebox to watch this slaughter, Auburn probably would've won." And with that innocent remark, barely discernible through the chattering of her teeth and the roar of the Alabama fans as the Tide scored their umpteenth touchdown, it dawned on me that maybe my actions could have an impact on the game. Unknowingly, my wife-to-be had saddled me with the burden I have carried to this day.

Once I realized my power to affect the Auburn-Alabama game's cosmic field, I desperately began searching for the right combination of pre-game actions which could reverse Auburn's growing string of consecutive losses and bring the great scheme of things back into proper alignment. I tried and discarded one lucky outfit after another. I went to Birmingham the day before the game. I went the day of the game. I parked at Legion Field. I rode the bus in. But nothing worked.

Each year, I studiously analyzed my habits of the year before, throwing out some things, keeping others. But not until 1982 did my painful, trial and error process find the winning combination. After five years of wandering in the wilderness, I went to Birmingham a day early that fateful weekend, stayed with a friend who is as rabid an Auburn supporter as I am, and attended the first Auburn-UAB basketball game and the Jefferson County Auburn Club's "Beat Bama" party. The day of the game, I parked in a new spot on the hill in front of the Hilton—Auburn's team headquarters—watched the team board their buses, and caught the stadium shuttle bus in from there. And it worked! Auburn won 23-22. Confirmation came in 1983, when I carefully followed the same pre-game ritual to lead the Tigers to a 23-20 win and the SEC title.

You may be wondering what happened the next two seasons, when Auburn lost two in a row to the Tide. Up until now, it's been one of my darkest secrets, but the guilt has gnawed at me until I finally have to admit it. It's all my fault that Bo went the wrong way in '84. I'm to blame for Van Tiffin's last-second, game-winning field goal in '85. In the interest of finding a closer parking spot,

MAY THE BEST SIDE WIN—Alabama mascot Big Al and Auburn's Auby the Tiger got together prior to the Tiger-Tide game in Jordan-Hare Stadium to air their views on who was number one. Auby got the last laugh, as Auburn won the state championship and a share of the SEC title with a convincing 30-20 pasting of the pachyderms.

—Photo by AU Photo Services

I altered the pre-game karma. Maybe I can be forgiven for doing it the first year—after all, defining every factor in the correct cosmic scheme is a tricky business—but doing it a second time, just because my friends scoffed at my pre-game superstitions, is something I'll carry with me to the grave.

I haven't made the same mistake again. I reclaimed the correct parking space in 1986, reunifying the energy field and once again establishing Auburn's dominance in the series. Once the ritual was reestablished, Lawyer Tillman's "reverse to victory" was all but a sure thing. And everything has remained in harmonic balance ever since, resulting in a three-game winning streak and two more SEC crowns heading into 1989.

So you can imagine my panic as the first Auburn-Alabama game to be played on the plains neared. Everything I had learned through years of experimentation in Birmingham had no validity. Or did it? There was no way to be sure. As the game approached, I mapped and remapped my strategy. I checked the positions of the planets. I called Jeanne Dixon. Nothing could be left to chance with a successful conclusion to such a

THE AUBURN ALUMNEWS is published nine times a year by the Auburn Alumni Association, 317 S. College St., Auburn University, AL 36849-5150. Officers of the Alumni Association are: President, Ruel Russell '48; Acting Executive Director W.D. Powell; Executive Directors Emeriti, George L. (Buck) Bradberry and Joseph B. Sarver, Jr. '37; Directors, Kaye Lovvorn Adams '64 and Pat Brackin; Associate Directors, George Atkins '55, Michael Harris '79, Julian Holmes '62, George Freeman, and Ken Pylant '73; Board of Directors: John G. Blackwell '64, Joyce Reynolds Ringer '59, Charles L. Mayton, Jr. '49, Harold C. Sharpe, Jr. '41, Pamela Wells Sheffield '65, Cynthia Williams Athey '72, Russell E. Allman '69, J. Patrick Galloway '51, Thomas H. Lowder '72, Elmer Cleve Wester, Jr. '59, Paul J. Spina, Jr. '63, J. Ford Laumer '62, David F. Smith '56, William E. Powell, III, '66, Marian Foreman Moore, class of '53, and Batey M. Gresham '57, ex-officio. Second class postage paid at Auburn University, AL 36849-5150. Postmaster: Send address changes to 317 S. College St., Auburn University, AL 36849-5150.

historic occasion as Bama's first visit to Auburn on the line.

As the game approached, I went into action. I called my friend in Birmingham and told her to park her car on the hill by the Hilton—just in case. I hired someone to pay \$5 to ride the bus out to Legion Field, sit in the stadium while the game was played in Auburn, then mill around for three hours after the game before catching a bus back downtown.

Meanwhile, back on the plains, I went to the Auburn-UAB basketball game and the pep rally preceding it Friday night, fingers crossed that this would successfully substitute for the "Beat Bama" party. On game day, I parked on a hill in front of the Hotel and Conference Center (Auburn's answer to the Hilton), tailgated at some Birmingham friends' van which has now been put in storage to await the game's 1993 return to Auburn, attended the Tiger Walk, and hoped for the best. And it worked! As anyone with orange and blue blood surely knows, the Tigers sent the upstart Tide packing with a 30-20 win. The space-time continuum remains whole.

So don't worry about the next three Auburn-Alabama games in Birmingham, or the 1993 encore in Jordan-Hare. I've got the winning pre-game rituals down pat. My main concern is the possibility of Alabama moving its 1994 home game to Tuscaloosa, but I'm already making plans for that. The alignment of the planets looks good for then, and the Earth's magnetic field should be in the proper polarization. Using an Alabama campus map, I've already found a nice hill to park on, and it's a simple matter to attend the basketball game and "Beat Bama" party in Birmingham, then take I-59 to Tuscaloosa the day of the game. I think I have everything pretty much under control except for one thing.

Does anybody know if Tuscaloosa has a Hilton?

When Auburn beat Alabama 30-20 in the first-ever varsity football game between the two schools played in Auburn, one of the Tigers' greatest fans was not on hand to see it. Jack H. Adamson '43, whose wife, Anne, works in the Alumni and Development Office and who was a regular fixture at Tiger football and basketball contests, class reunions, the Golden Eagles weekend, and other alumni functions, passed away on Saturday, Nov. 25, just one week before the game which he had looked forward to for so long.

But those who knew him feel that Jack still viewed the game somewhere. Noted his daughter, Beverly Adamson Hunter '70, at her father's funeral: "Now he'll have the best seat in the house and he won't even need his ticket."

Behind the Headlines—

Pausing to Reflect

By Kaye Lovvorn '64

The most recent December graduation took on an added dimension for those of us in the Alumni & Development Office because on December 8 we graduated four students from our office family and sent another off to do his practice teaching.

THE BOBBSEY TWINS?—At December graduation, Robin Olsson '89, left, and Sonia Seay '89 completed four years as students at Auburn and as employees of the Alumni & Development Office. The two, who shared classes and worked side by side, were often called the Bobbsey Twins by their professors in wildlife management. —Photo by Mike Jernigan

Robin Olsson and Sonia Seay completed four years working in the Alumni and Development Office's data entry division and Steve Stiefel completed his time with *The Alumnews*, following the example set by his sister, Anita Stiefel '85. And, though Geoff LoCicero had left us to do a fulltime internship prior to graduation, he frequently dropped by to say hello or borrow a typewriter or a word processor. Russell Calhoun won't graduate until March but he'll be practice teaching next quarter. Congratulations, kids; we're going to miss you.

But before I leave the subject of graduation, I have to add a personal note. We all know that graduation is a family affair. Sometimes it's more a family affair than others, and the recent graduation of Sonia Lovvorn Seay certainly involved most of her family. It started long ago with her grandmother, Loyce Lovvorn, whose support continued unceasing. It came from her uncle, Fouts Adams '65, who encouraged her, took her to lunch, found her books and magazines, and did all those things her father would have done if he had been in Auburn to do so. It came from her father, Harold Lovvorn, and her mother Betty Cox, who proudly came to see her graduate; her brother, Brad, and her sister, Tammy King; her Aunt Kaye who repeatedly brought her to Auburn and taught her to love the place as a tiny child. And, last but certainly not least, from her husband, Ronny Seay, who moved to Auburn, found a job in Montgomery where he spent the past four years and three months commuting to so Sonia could go to Auburn—because she never wanted to go anywhere else.

Saying Goodbye

Bobbie Boisclair is retiring from the Office of Alumni and Development at the end of December, following the footsteps of Elizabeth Caine who retired in June. Although many alumni perhaps were not familiar with their names, each of them was a very important part of the Auburn Alumni Association over the past several years. They shared many things in common, being always kind, helpful, and considerate. Mrs. Caine and I laughed about which of us had been here the longest and we first met when she used to file alumnalities materials for me back when *The*

Alumnews occupied 150 percent of my time. Over the years, she became a secretary and then the executive director's secretary. And although she assures me she loves retirement, and Mr. Caine is happy to have her home with him fulltime, I miss seeing her. And although Bobbie, who has directed the data entry staff, is looking forward to having fulltime to enjoy the new home that she and Charlie have built, I'm going to miss her when I go down with one of my infernal puzzles to solve as to which Joe Smith this is and why is he in Timbuctoo. Best wishes, to both of you, Bobbie and Elizabeth.

In Memoriam

In recent weeks, three members have fallen from the ranks of Auburn men whose passing should be noted here, two of them with connections to our office family. First is Ed Bagwell, father of Karen Bagwell of the Office of Alumni and Development accounting department and professor emeritus of Geography. Prof. Bagwell's death in November saddened the entire Auburn community, because he had made himself beloved and known perhaps even more widely in the town than on campus. The Geography Department has set up a memorial fund through the Auburn University Foundation for all of his students who wish to remember him.

The second Auburn man we must mention here is Jack Adamson '31, husband of Anne Adamson of the alumni programs staff, whom Mike talks about above. Jack, too, is being honored by gifts to the Auburn University Foundation.

And finally, we have to recognize the passing of Alvin A. Biggio '26. Although Mr. Biggio's ill health had largely prevented his coming to Auburn in recent years, anyone who is interested in Auburn history and the history of the Alumni and Development Office must recognize his contributions to our programs and the university. As a founding director of the Auburn University Foundation and as the chairman of Auburn's first development drive in the early sixties, Mr. Biggio contributed much to Auburn in time, effort, and support—service which Auburn recognized with an honorary degree. He was a gentleman of the old school whose charm and warmth made him a delight to people of all ages.

Alumni President Talks of Auburn, Association Plans

EDITOR'S NOTE: Ruel Russell, Jr., '48 of Birmingham, president and CEO of Atlas Metal Company, Inc., a member of the Auburn Alumni Engineering Council, and past president and chairman of the athletic affairs committee of the Jefferson County Auburn Club, was elected national president of the Auburn Alumni Association at Homecoming. In this interview with Mike Jernigan '80, he discussed his memories of Auburn, his plans for the Association, and his thoughts on the relationship between alumni and the university.

ALUMNEWS: Tell us a bit about yourself and your family. Did your children attend Auburn?

RUSSELL: My wife, Margaret, attended Auburn and graduated in 1947. We have a son, who graduated with an undergraduate engineering degree from Georgia Tech and got his master's at the University of Houston, and a daughter who attended Auburn.

ALUMNEWS: Can you talk a little about your student years at Auburn?

RUSSELL: I started out in 1941 as a co-op student at Auburn, working with U.S. Steel, then left school to serve in the Army Infantry in Europe during World War II. I returned to Auburn in 1946 and went seven straight quarters to finish my degree in industrial management. I was a Delta Sig at Auburn, and I probably enjoyed fraternity life a lot more than I did academics. But my college experience was very rewarding and enjoyable. I made a lot of friends in college that I still associate with, and I am constantly running into old Auburn friends in my business dealings.

ALUMNEWS: Tell us a bit about your career and your current business interests?

RUSSELL: I worked with U.S. Steel [USS] in Birmingham as a division industrial engineer from 1948 until 1959, then changed career directions and transferred into the company's personnel services division. In 1974 I became assistant to the vice president and general manager of the Southern Steel Division of USS and I transferred to Pittsburgh in 1977 before retiring in 1979 to form Atlas Metal Company—a steel warehouse business. Since then I have acquired partnerships in Advanced Floor Systems, Inc., in Atlanta, and R and R Metals Company in Houston, Tex. I currently serve as CEO of all three companies.

ALUMNEWS: What were your feelings on being nominated for the Alumni Association presidency during such a difficult period, and why did you accept it?

RUSSELL: I was very flattered. I debated a long time about taking the position because of my business interests and the time the job took, but I got a number of calls from alumni all over the state encouraging me. It's a real honor to be elected and I just hope I can do a job

NEW ALUMNI PRESIDENT—Recently elected Alumni Association President Ruel Russell '48 of Birmingham and his wife, Margaret Sims Russell '47, entertained both Tiger and Tide fans alike at their tailgate party prior to the Auburn-Alabama game. Mr. Russell, president and CEO of Atlas Metal Company, Inc., was elected to his new post at the annual meeting of the Association on Homecoming Day.

—Photo by Mike Jernigan

that will satisfy everyone and help the Association put its recent problems in the past. I think we will.

ALUMNEWS: What do you feel are the biggest challenges facing Auburn University, and how do you think they should be met?

RUSSELL: Probably the biggest single challenge facing Auburn is getting enough money to do the job we need to do in educating our children. All of us as alumni need to exert all the influence we can with our governor and state legislators to make sure Auburn gets its fair share of state support. We also need to do the job in development—we have only touched the tip of the iceberg as far as developing and tapping our sources of private support.

ALUMNEWS: What do you see as the most important functions of Auburn University?

RUSSELL: The primary mission of Auburn—and all universities for that matter—should be teaching. After all, that's what Auburn is there for—to turn out educated citizens who will help improve the quality of life in our state and nation. In addition, I feel it is vital for Auburn to continue to develop a strong research program. Many private businesses in this country have discontinued their research and development programs, and if the U.S. is to maintain its technological edge in the world market, much of the responsibility is going to fall on our universities.

ALUMNEWS: What do you feel is the role of the alumni board in the operation and administration of the Office of Alumni and Development?

RUSSELL: I feel that the alumni board needs to operate basically as a board operates in the business world—in an advisory and policy-making capacity. We have a number of very knowledgeable people from across the South on our alumni board who love Auburn and want to see it prosper, and I think they have much to contribute to the university's

well-being. I also feel that the alumni board should play a strong role in the university community and exert all the influence granted to it by the Association's constitution and bylaws. I strongly disagree with those who say the alumni should not play an important role in the direction of the university. It is good for the university for the alumni to have a strong voice.

ALUMNEWS: What do you feel is the correct relationship between the alumni board, the Alumni and Development Office, and the university administration?

RUSSELL: All should work very closely together. If you have reasonable people in all three areas—and I think we do—there should be no animosity, though there may occasionally be healthy disagreement. What you have to make sure of is that everybody is singing out of the same hymnbook when it comes to the goals and directions of the university. Everyone should be pretty much headed down the same path to build and improve Auburn.

ALUMNEWS: You noted recently that the only "side" you would be on in the recent controversy involving the executive director is the Auburn side. How are you working to end any divisions resulting from the controversy?

RUSSELL: I still maintain that I'm not on any side but the Auburn side when it comes to the controversies we've had in the past. I am doing some things to help further improve any problems remaining, but I really don't want to discuss the specifics at this time.

ALUMNEWS: Do you feel that the reputation of the Alumni Association has been tarnished by the controversy, and if so, what needs to be done to improve that reputation?

RUSSELL: I really don't believe any long-lasting harm has been done and I think the Association is already moving back in the right direction. As soon as we get our new leader in place, I think

we are going to put the past behind us very rapidly.

ALUMNEWS: How do you see the relationship between the alumni and development functions of the Office of Alumni and Development?

RUSSELL: I think the two areas should work closely together and complement each other well. In improving our development efforts, however, I don't think we need to diminish the role of the alumni functions, and I don't believe anyone wants to. We want to improve both areas, because raising funds requires a team effort. We have had one of the most active and effective Alumni Associations anywhere in the past, and I think we will continue that in the future.

ALUMNEWS: What are your thoughts on the recent naming of Joe Busta '69 as Vice President for Advancement?

RUSSELL: I have talked with Joe on several occasions and I have been more impressed with him each time. There were four of us on the committee which selected him [President James E. Martin '54; Batey Gresham '57, president ex officio of the Alumni Association; Gilmer Blackburn '50, president of the Auburn University Foundation; and Russell], and all of us were extremely impressed with him. He has done a fantastic job at the University of South Florida and I think he'll do an excellent job at Auburn as well. We're getting a very good man.

Auburn Prepared For Next Decade: Can't Take the 'Human' From Human Sciences

By Mary Ellen Hendrix '84

Aging, changes in family structure, substance abuse, homelessness, financial planning, food safety, water quality, clothing needs, health care, stress, suicide, literacy: all these are vital national concerns and issues constantly addressed by Auburn's School of Human Sciences.

"This is the time for our school," said Human Sciences Dean June M. Henton. "We're on the national agenda and, unlike any other curriculum, we're geared toward focusing on these problems. We are uniquely equipped for the support of American families."

Dr. Henton, who left Oregon State University in September 1985 to come to Auburn, is excited about her school's future and its role in bettering Alabama life. She praises her faculty as "the best." "Our people do a very good job," the dean said. "They consistently have good teaching evaluations and are traditionally known for the quality of advising." She feels the school's overriding accomplishment, however, rests in the emphasis placed on excellence in programming.

The School of Human Sciences attracted an enrollment of 683 (628 undergraduate, 55 graduate) students in the fall of 1989—a 42 percent increase over the fall of 1985. The school, which holds six professional accreditations and endorsements, consists of three departments: Consumer Affairs, Family and

Child Development, and Nutrition and Foods. Under these umbrellas are many areas of study.

Within Consumer Affairs, for which Dean Henton is acting head, the 352 undergraduate students major in apparel and textiles, fashion merchandising, or interiors and housing. This department has received a fair amount of publicity in recent years for attracting top-flight designers to speak at Auburn. Recent visits include: in 1987, Elsa Klensch, originator of Cable News Network's "Style" program; in 1988, Bijan, internationally acclaimed menswear designer; and in 1989, Pat Kerr, fashion designer and collector of historic textiles.

Also adding to the department's high-profile image is the fact that the textiles and apparel industry makes up 33 percent of Alabama's manufacturing base, employing more than 100,000 employees statewide. Thus, a close relationship exists between the needs of apparel and textile manufacturers and the research efforts of some of the Human Sciences faculty.

"We are heavily involved in forecasting for industry," said Dean Henton. "There have been changes in individual and family needs. The question for industry is 'What does the consumer want?' We educate students who know the product and the consumer, and we're committed to helping industry understand American families."

Some of the more innovative ways the school has responded to industry include: the nationally unique Apparel Production Management option within Consumer Affairs; the involvement of faculty and students with international trade shows and markets; and Auburn- and Atlanta-based events such as the Apparel Sourcing Fairs, where distributors are matched with apparel producers, and the Back to Basics seminars, which teach fundamental business practices for textiles and apparel industry.

Another of the school's departments, Family and Child Development, which has a 122-undergraduate enrollment under the leadership of head Marilyn Bradbard, allows students to select from the full range of study—infancy and preschool, school-age and adolescence, or adult and aging. In addition, consumer and family economics was recently moved from Consumer Affairs to this department. This past March the department also received final approval for a Ph.D. program, the only one of its kind in the state.

"The program takes an integrated approach to studying individual and family relations across the life cycle," said Dr. Bradbard. "It is one of the few programs in the country that focuses on interpersonal relationships over the lifespan rather than emphasizing child development and/or family relations."

"Students work with nationally-known faculty who specialize in the study of relationships between infants and parents, adolescents and parents, siblings, friends, marital partners, working peers, and extended family members. This provides opportunities to develop an understanding of social and emotional development over time."

Finally, the Nutrition and Foods Department, which has an undergradu-

STRAIGHT AHEAD—Human Sciences Dean June M. Henton's determined look isn't by accident. She has very specific goals for her school; and, if resolve has anything to do with it, those goals are well on their way to becoming reality. —Photo by Mary Ellen Hendrix

ate enrollment of 154 under interim head Esther Winterfeldt, provides study in food science, dietetics, nutrition, and hotel and restaurant management. Hotel and restaurant management is one of the school's newest and hottest areas and reflects the boom in the tourism and hospitality industry. The program also indicates the school's international emphasis.

"Our students are trained to have a world perspective," Dean Henton said. "We have been internationalizing our curricula because that's what industry demands. Most of our students serve internships, and those internships are all over the world. Because of their preparation, our graduates have high placement rates into jobs."

Some students have traveled to London department stores for their internships, to the product development department of Triumph intimate apparel in Germany, to Hong Kong, to Liz Claiborne in New York, or to work with Elsa Klensch and CNN in New York. And these are but a few examples.

Although the school has many success stories, there's still room for improvement. For instance, Dean Henton would like to see male enrollment rise. Fall 1989 saw 60 undergraduate males in Human Sciences and 17 graduate males. A recently completed publication, the "Human Sciences Strategic Plan, 1990-2000," commented on the situation:

"There tends to be a lingering impression that all Human Sciences graduates are trained as generalists, and that the curriculum they study is more relevant for females than males. Contrary to this erroneous view, all curricula in the school have been changed to represent specialized programs of professional training which lead to many diverse employment opportunities for our students."

"The eight undergraduate majors offered by the school's three departments are quite dissimilar, some emphasizing the arts while others are built on the application of the basic sciences. Regardless of this diversity, however, our stereotyped image continues to impede recruitment of male students..."

In spite of "lingering impressions," Human Sciences has come of age, promising to be increasingly in the spotlight nationally and at Auburn. Thus, Dean Henton doesn't dwell on possible misconceptions. Instead, she determinedly reaches for the improvements needed to further boost her school's prominence.

Of course, two of the biggest needs for the school, says the dean, are space and money. Human Sciences has 55 faculty in a space designed for 20 faculty members. Spidle Hall, built in the 1950s, was meant to serve 200 students in a teaching, not research, capacity.

"We have no space," Dean Henton said. "You cannot recruit quality faculty and expect them to share an office. The apparel industry helped equip one of our labs, and we have renovated our graduate student area with 19 stations, but that doesn't increase our total space. One of our goals is a new building."

Money-wise, Dean Henton emphasizes the need for named professorships, an increased stipend level for graduate students, and continued development of constituency fundraising. "The uneven pattern of state funding for salary increases makes it difficult to keep good people," she said.

There has also been increased emphasis on research and graduate study and a resulting need for more senior researchers and full professors. "Our faculty are truly extending themselves," the dean said. "They are pacesetters."

The School of Human Sciences works well with other academic areas on campus, as demonstrated by its several interdepartmental programs. Some of these include cooperation between Food Science and the Colleges of Agriculture and Sciences and Mathematics, between Apparel and Textiles and the Colleges of Business and Engineering, and between Family and Child Development and the College of Education. Dean Henton predicts demand for interdisciplinary programs will only rise.

Dean Henton credits the strides made in the School of Human Sciences to the mutual support of students, faculty, alumni, and friends. "Our accomplishments have proven the power of united efforts. Our academic programs are flourishing, international leaders are sharing their experiences and talents with students, faculty are reaching out to industry, and our alumni are excelling. By working together Human Sciences is addressing the challenges and needs of our nation and the world today."

Art Graduate Fights Oppression and Boring Clothes With the T-Shirt

By Steven Stiefel '89

Batman" T-shirts could be seen virtually everywhere last summer, hinting at the phenomenon the T-shirt has become. Comfortable and versatile, it seems to be the preferred clothing of everyone under the age of 40. A large part of the T-shirt's popularity lies in the versatility of the design printed on it, which delights graphic artists hoping to create the newest sensation in the marketplace. Scott Peek '87, an Auburn-based designer, is one of those making a mark in the T-shirt world. His Moinx and Company provides consumers across the country with original, upbeat designs for T-shirts.

The key to his success has been the "Moinx." "Moinx," explained Scott, "is a cartoon-like animal I first painted while still an art student at Auburn. My friends started calling it 'the moink,' and the name stuck." His creation looks like no particular animal, but rather an abstract hybrid of a dog, a cat, and a hippopotamus in one creature. An associate at the Birmingham firm where he worked after graduating, Weaver, Miller, Martin, Inc., said its plural name should be "moinx."

Today a company brochure describes the moinx as "the perfect pet for adults. Intelligent. Always new. Needs no litter box. Big soft (dry) nose. Decorator colors. Attractive to the opposite sex. Packable. Stackable. Loves taking baths. Stays in the lines. Won't eat the last truffle. Thought-provoking. Debonair. Body-hugging. Fun."

"Fun" sums up the idea. "I love designing T-shirts," Scott said. "I've made shirt designs ever since high school in Ozark, when a history teacher started a screen printing business on the side and convinced me to get involved

with my artistry. I also like the freedom this job allows. I can dress however I like and work whenever I choose. There's time to think about what I'm doing and work on a job until it's the best it can possibly be."

Scott is an equal partner, along with Robert Lunday and Tony Huntley '85, in Master Graphics screen printers in Auburn. Robert handles business matters, while Tony supervises all printing and shipping of shirts, assisted by his two brothers, Alex '88 and Doug '89. Scott manages Moinx and Company and all of Master Graphics' art. One of his artists is Cathy Lawson '84, and the three owners employ students as part-time help. Their ties to Auburn help to create a close-knit group of professionals.

"We all like Auburn," said Scott. "There's more to Auburn than just football, but you couldn't tell from the way some people talk about it. It's a good place to live. You can always find new blood around Auburn. It's always changing and filled with young people. All of that hard work in art school helped me develop as an artist. The more effort you put into school, the more you get out of it. I like the campus type of surroundings."

While still working in Birmingham, Scott would send his designs to be printed by Tony and Robert. Eventually they invited him to be a partner in Master Graphics. "I knew the only way my idea for the shirts would succeed was if I moved back to Auburn, where the opportunity existed," he said. "My art directors at the Birmingham firm encouraged me to try with this business since managing my own design company had always been a dream of mine. The other reason I started doing the shirts is because there are so many shoddy T-shirts out there."

Moinx and Company gives consumers a stylish alternative to remedy this dilemma. The designs don't exclusively center around Scott's cartoon creation, but also feature avant-garde artwork, often by other Auburn artists. Sophisti-

cated and witty, these designs aim at intellectuals with a sense of humor who wish to dress in what the company's brochure calls "attitude wear." The humor on the shirts comes from thoughtful assertions or a clever play on words such as "Hog in Daze." Anyone who enjoys comics in the manner of "The Far Side" will appreciate the shirts, but Scott prefers not to call them "pop-oriented." They fit within the realm of the "Postmodern" chic—a kind of absurd amusement with everyday existence as seen through the eyes of contemporary artists. "We just try to do different things and use a variety of artists. I like to think of it as a collaboration of modern art."

This collaboration occurs with freelance designers from across the nation who send their artwork in hopes of getting their designs printed along with Scott's. "This isn't just a local thing," he said. "It's nationwide. People see our designs at exhibitions or see our brochures and send their art in for consideration. I've never even met some of the artists, like this one guy who lives in California and will fax designs to us. I only do about a third of what we print now."

"I still do artwork for Master Graphics, creating fraternity and sorority shirts for parties and formals. I also freelance as an illustrator for some agencies. That provides a steady income, while I can do some moinx designs and pay artists that I know a percentage to do the rest. It gives them a little extra money and something to show when they try to get other jobs."

Moinx and Company has representatives in several states and all over the Caribbean. That souvenir T-shirt you bought in the Bahamas might have been made in Auburn. "We pick up a lot of our representatives at exhibitions who get us accounts in other parts of the country. In January, we'll participate in possibly our biggest exposition yet, the International Fashion Boutique Show in New York City."

Print magazine recently featured three moinx plates in its regional design annual, making Moinx and Company the first T-shirt art company ever to get three pieces displayed in that prominent publication. The company's mail order advertisements in reggae magazines did well, and the shirts continue to get exposure at T-shirt expositions. The Auburn apparel store "Behind the Glass" first offered the shirts, and now Scott finds his company's designs across the country. Art and commerce play equally important roles for today's artists.

"We sell the shirts for \$6.95 each, and shops in California sell them for \$20 or more. They're the ones who make the big money." While the shirts are found in stores nationwide, locating one might prove difficult because of the enormous market for designer T-shirts. Alumni can find the shirts in Auburn at "Behind the Glass" or "J&M Bookstore," or write the company at P.O. Box 868, Auburn, AL 36831-8100 for information or a brochure soon to be published featuring several of the designs.

Scott envisions the company growing. "We might expand to other types of apparel, and try other colors and designs. We're becoming more selective in what we choose to print because the supply of art sent in has increased. The main criteria are sales potential and quality of workmanship. We look for fun designs with positive messages. We strive to fight oppression and boring clothes around the globe."

Auburn in the '80s: Growth & Change Is Unprecedented

By Sam Hendrix
AU News Bureau

Earlier this fall, Michael McCartney '57, president pro tempore of the board of trustees, said the 1980s at Auburn would be remembered as a time of building.

A glance at the current campus map bears out Mr. McCartney's point. At least 33 major facilities have been completed, begun, or planned during the decade—valuing more than \$200 million.

But new buildings and an increased enrollment are not the only differences Auburn has realized over the past 10 years. A thorough evaluation of departments, schools, and colleges resulted in reorganization of the administrative structure in 1986. Furthermore, all six vice presidents and 12 of the 13 deans were appointed to their present positions during the decade.

"This university has come a long way during the 1980s, especially considering the decade began amid a devastating recession and a period of campus unrest," President James E. Martin '54 said recently. The result is a university that attracts some of the South's top students; produces graduates who are sought after by industry and graduate and professional schools; and supports a faculty known for its teaching, research, and extension capabilities.

The early 1980s were clearly not the best of times at Auburn, where the state appropriation was prorated six percent in 1980 and measures such as a hiring freeze and limits on purchasing and travel were taken to save money. President Harry M. Philpott had announced his retirement, and the administration of H. Hanly Funderburk '53 ended after months of campus unrest when Dr. Funderburk resigned in February 1983. Wilford Bailey '42, former professor of pathology and parasitology in the College of Veterinary Medicine and academic vice president from 1966 to 1972, was then named interim president.

Dr. Bailey, who the previous September had been named coordinator of special projects in the Office of the Vice President for Research, faced the greatest challenge of his career. During his year as president, he guided the institution as it turned 180 degrees, from a university in trouble to one moving toward excellence.

"It was an exciting period, though my role was relatively minor," Dr. Bailey said. "We had been through several years of turbulence, and I was fortunate, having had more than 40 years experience in teaching and administration at Auburn to serve as a focal point."

"During that 12-month period, we were able to move toward healing the wounds that had developed because of the loyalty of Auburn people. The university community and friends of Auburn were anxious to come together. I emphasize that we had to put problems behind us, look to the future, and work together, taking advantage of the opportunities afforded the university. I believe it was that philosophy that most contributed to the healing."

Now back at the College of Veterinary Medicine, where he is writing a book on the relationship between academics and college athletics after serving as president of the NCAA, Dr. Bailey maintains his belief that the university's strength lies in its people.

"The academic progress made during the 1980s may be attributed in large measure to the continued loyalty and quality performance of the faculty, which for years has been outstanding, particularly when we consider the relatively poor resources Auburn has had to recruit and retain outstanding faculty," Dr. Bailey said.

"The fact that Auburn more and more has been able to attract a student body that is exceptionally well prepared to take advantage of the academic opportunities offered here has played a role in the university's development. So has the loyalty of Auburn alumni and friends, who have made possible an increase in private giving."

Most of the progress of the decade has come under the administration of Dr. Martin, who succeeded Dr. Bailey as president in 1984. Dr. Martin credited the faculty's "tremendous effort toward improving the quality of Auburn's teaching, research, and public service programs" as a key factor in Auburn's academic progress in recent years.

He said that he found Auburn to be a good institution when he arrived as president more than five years ago, with

MOINX MAKER—Scott Peak '87 displays some of his original designs in his Auburn studio. He uses his training as a former art student to wage the war against boring clothes.

—Photo by Steven Stiefel

a faculty "sincerely interested in the accomplishments of students and in helping students gain access to a quality education." Dr. Martin says that while the faculty maintains that attitude, and while quality teaching is the university's primary mission, Auburn's capabilities now exceed those he found in 1984.

"I think we have built on a solid base with faculty more heavily involved in research efforts, in generating new knowledge, and in outreach programs," he said. "Our capability of moving information at a more rapid pace with greater accuracy has increased, and the addition of the satellite uplink allows us to deliver quality programs beyond the borders of our campus.

"I think, though, that we've just scratched the surface and that with a more competitive level of funding Auburn can continue to make significant strides. What we are able to accomplish will be a function of the level of support the institution receives," he said.

"State support is an investment in the future of the university and the state, and it impacts on whether there will be additional businesses brought into Alabama, on how many, and what types of new jobs are created.

"If we're going to be competitive, then it's necessary that we be competitive with respect to resources made available to the institution."

One major step in this direction of equity is formula funding and indexing, concepts which provide that universities be appropriated funds based on factors of productivity, including student credit hours taught, degrees awarded, and types of programs offered.

Auburn, which is comprehensive in scope, awarded one-fourth of the state's baccalaureate degrees in 1988, yet received the lowest percentage of funding given its ACHE-determined needs for that year.

"The Legislature's use of a formula and indexing for appropriation purposes is directly correlated to the ability of the university presidents and the Alabama Commission on Higher Education to agree on the priorities for higher education and to agree on the formula."

Dr. Martin said that Auburn's goals for the coming decade will depend on funding. "The potential is tremendous, but it's a question of whether adequate support occurs. If it does not, and Auburn continues to be funded at 80-85 percent of the regional average for this type of institution, then I think Auburn's continued improvement will be at a very reduced rate, if at all."

Dr. Martin said he remains optimistic that the 1990s will see Auburn continue to grow in the quality of its faculty, in the preparation of students, in faculty and staff salaries, in the amount of graduate stipends, in the acquisition of instructional equipment, and in the standards of the library.

Dr. Martin is excited about Auburn's future, but he agrees that looking to the past is also beneficial. He said that he hopes sometime during the 1990s—provided funding adequately covers the necessary objectives—Auburn can begin planning a museum, which Dr. Martin said could house artifacts and equipment used at Auburn over the years and which

Differences Over the Years

A look at how Auburn has grown in a number of areas during the past decade.

1979		1989
18,329	Total Enrollment	21,701
16,336	Undergraduates	19,349
1,993	Graduate Students	2,352
7,719 - 42.1 %	No., Percentage of Women	9,452 - 43.6 %
10,610 - 57.9 %	No., Percentage of Men	12,249 - 56.4 %
448	Black Students	843
284	International Students	715
3,938	Degrees During Year	4,177
75,159	Number of Alumni	132,730
22.3	Freshman ACT Average	23.7
22	Named Professorships	51
1,042,000	Library Volumes	1,582,126
\$6.2 million	Overall Private Support	\$15 million
\$14 million	Year's Construction	\$40.2 million
\$60.3 million	AU State Appropriation	\$125 million
\$13 million	University's Endowment	\$49 million
\$220 per qtr.	Resident Tuition	\$492 per qtr.
\$440 per qtr.	Non-Resident Tuition	\$1,476 per qtr.
\$17.6 million	Approximate Tuition Income	\$40 million
\$22.2 million	Total Organized Research	\$55 million
61,000	Jordan-Hare Stadium Capacity	85,200
\$10	Cost of a Football Ticket	\$18

could cover the entire programs of the university.

"We've got a working steam engine, a cut-away model of a 1951 jet engine. These are not state-of-the-art, but years ago they were," he said. "We ought to have a place where we can preserve some of these things. It would be a very educational place."

But above all, he says, Auburn must remain committed to its primary mission of providing the region's highest quality teaching.

The university has done, and is doing, several things to maintain and strengthen its teaching capabilities. Among those:

- * The hiring of Ronald J. Henry as vice president for academic affairs;

- * The establishing of a teaching effectiveness center;

- * A strong statement of support for quality teaching adopted recently by the board of trustees;

- * The allocation of an extra \$3 million over the past three years for the purchase of instructional equipment across campus;

- * The emphasis on increasing graduate student enrollment, which jumped by 37 percent—from 1,713 to 2,352—between 1983 and 1989; and

- * The core curriculum being revised and strengthened.

While Auburn's recent past has seen progress on many fronts, Dr. Martin said he believes the future is even brighter. "The coming decade should be an exciting time for Auburn. I predict that Auburn will make an even greater contribution to Alabama and its economy than it ever has."

Student Architect "Rebuilds" AU's Jordan-Hare

By Leslie Gingles Hirsh '84
AU News Bureau

Fifty years of football and more than 1,500 hours of work went into Brian Powers' gift to Auburn. In celebration of Jordan-Hare Stadium's 50th anniversary, Mr. Powers, a third-year architecture student, has donated a 9½-by-8-foot model of the stadium to the Auburn Athletic Department.

The replica is exact in nearly every detail down to the leaping Tigers on the

six-inch scoreboard, tiny markers on the field, and miniature concession stands. The model, which was opened to the public on Sept. 26, in the reception area of the new Auburn Athletic Center, will eventually be housed in the facility's museum, scheduled for opening in the next six months.

Mr. Powers said he decided to build the model "to celebrate the stadium's anniversary and the opening of the new athletic complex. I just wanted to make it for Auburn."

While the model was not commissioned by the athletic program and was not part of an assigned class project, Mr. Powers will receive a two-quarter scholarship from the Athletic Department and three credit hours from the Department of Architecture.

"In some circumstances, students are awarded credit hours for outside work," said Dr. Dan Bennett, head of the Department of Architecture. In the spring of this year, Mr. Powers submitted a proposal about his project to the department that "was as impressive as a lot of professional proposals," said Dr. Bennett.

While students and professors have been impressed "with the sheer size of the model," he said, "most architectural firms would pay upwards of \$25,000-\$30,000 for a professional to build a model of its craftsmanship. The amount of planning and organization was very impressive for a young man."

The odyssey of Jordan-Hare fact-finding started more than a year ago in Mr. Powers' third-floor studio in the main architecture building, Dudley Hall.

"I literally took a year to read every piece of material on Jordan-Hare that I could get my hands on," he says. His studio attests to his research with three-foot piles of game programs, calendars, posters and media guides. "A lot of people were skeptical at first, since I was doing it on my own," Mr. Powers said. "My close friends just thought I was crazy to give up all my free time. But once everyone saw I was serious, they gave the project and me a lot of respect."

From the outset of early 1988, Mr. Powers considered the project a full-time job. "I went on a tour of the stadium with Jackson Davis, the project architect for the east side expansion." Then, armed with photographs and a full set of blueprints, he was "ready to start studying." By early May of this year, Mr. Powers began the painstaking task of putting his vision into reality. With \$500 donated by the Athletic Department, he bought the model's basic materials: balsa wood, poster board, paints, and foam board.

Using a scale of ⅛-inch-to-1-foot, he started from the inside on the field and worked his way out, "so the little details wouldn't get messed up in the process of building." He worked in the order of turf, stands, concessions, and eventually the parking lot.

"It was a constant decision-making process," said Mr. Powers. "The order I placed things in was critical. Every detail had to work toward the whole picture. For example, the different shadings in the colors of the concrete had to look three-dimensional, not too bland and yet not draw attention to any

one column or seating area. Good balance was key."

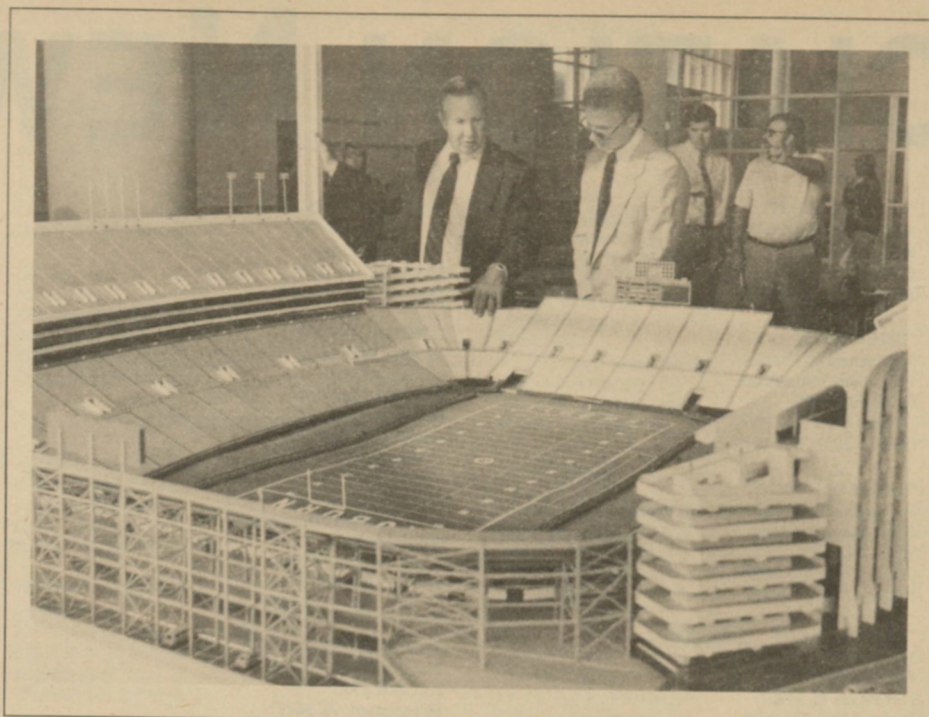

Mr. Powers, who has built models since he was 10 years old, says he grew up around amazing architecture during his world travels as a self-described "Army brat." A native of Taipei, Taiwan, Mr. Powers traveled across Europe and the United States until his parents, Mr. and Mrs. Rod Powers, settled in Tacoma, Wash. "When we were stationed in Germany, my brother and I were fascinated by the castles and loved to build models of them," he says.

Mr. Power's current fascination—to design athletic facilities—was sparked by his interest in Jordan-Hare. "One day I hope to work with an architectural firm and design large-scale sports complexes. There's a growing trend of popularity in sports buildings."

Through this vocation, he could continue building models "since they add a professional touch to projects and the details make it fun for everyone to get involved in the design."

Even in Mr. Powers' third-floor studio, his attention to detail makes most visitors revert to childhood fascination with doll house miniatures and model train sets. "People get really excited when they see the model. They try to get down on their knees for a doll's view."

"It's funny how people see things in my stadium they wouldn't normally

SUPER STADIUM—Brian Powers, right, a third-year architecture student, looks over his model of Jordan-Hare Stadium with Coach Pat Dye, Auburn Athletic Director and Head Football Coach. Mr. Powers recently constructed and gave the model to Auburn to display in the new Athletic Complex Building.

question, and then they sit in the stands and see that it really does look like that," he says.

Thanks to Mr. Powers' generosity and his dedication to Auburn football, generations of Auburn supporters will see the game field from an eagle's perspective.

Baggett Designing Her Own Niche in Southern Fashion

By Melinda Joiner

Reprinted from *The Huntsville Times*

Although many promising young designers view the future with stars in their eyes, Kathy Baggett '88 keeps her dreams firmly rooted in reality.

A Huntsville resident, Ms. Baggett recently won two honors, including an award for most promising design student in the "Departures '89" international apparel design competition sponsored by the Association of College Professors of Textiles and Clothing (ACPTC). But the 23-year-old has no plans to pack up her aspirations and move to a fashion capital like New York, Paris, or Milan.

"I don't want to be the next Donna Karan," she says. "I've been to New York City three times this year, and that's not where I want to be."

If her career's beginning is an indication, Ms. Baggett won't have to leave her home state to pursue her professional dreams. She already has secured a job as a childrenswear designer for Liberty Trouser Company in Birmingham, and she works part time with Huntsville artist and textiles designer Betty Grisham. Ms. Baggett believes living in Huntsville has provided her the advantage of being closer to the manufacturing process than she could be in a New York office. "I can see firsthand how the samples progress and relay that information to New York," she says.

As a designer for Liberty, she finds challenge in meeting the limits set by marketability and manufacturing technology, while maintaining innovation in style and theme and "putting a little bit of me in the line." Ms. Baggett put a lot of herself into the cruisewear line that garnered praise from the judges at the ACPTC competition. Working with nylon Techtile, a new fabric that looks like silk but is durable enough for ski

fashions, she created the Harlequin Holiday designs.

"The judges said they felt I had good understanding of construction and working with a difficult fabric," says Ms. Baggett, adding her entry was developed in a course at Auburn, where she earned a degree in clothing and textiles.

Her faculty sponsor, Lisa Christman, assistant professor of consumer affairs, says her former student's prestigious awards and artistic flair will enable her to go far in the world of design. "Kathy has no desire for the New York scene, but she can go far because there are tremendous opportunities for designers here in the South," she says. "Many people don't realize many of the apparel and textile manufacturers are here, so a designer can do quite well by staying in the South."

Ms. Baggett's love of design comes naturally, since her great-grandmother was a seamstress and her mother is an artist. Her first fashion prize was a second-place award for a handmade sundress in a sixth-grade 4-H competition.

Although she likes clothes, Ms. Baggett says she is not a clotheshorse. "I have a lot of black in my closet because it's easy to match, and I like outdoorsy clothes," she says. "But I'm not afraid to wear anything. I never have time to make my clothes anymore, but I never buy them at full price. I wait for the sales."

Ms. Baggett is equally pragmatic when it comes to her philosophy of design. "I admire Donna Karan and Liz Claiborne because they have an idea of what women want to wear and they know their customers," she says. "I enjoy watching the fashion shows and I appreciate them from a designer standpoint, but they're more art shows than anything. I respect what they do, but I don't choose to pattern myself after them."

Ms. Baggett, who designs primarily for infants and toddlers at Liberty, believes people are becoming more conscious about children's clothing, and she predicts a preference for primary colors—red, royal blue, yellow, and kelly green—will continue. Her approach to designing for children rather than adults is simple: "I try to be a designer who understands structure, and that carries over no matter who you're designing for. I like taking adult clothes and making them little."

Women Outnumber Men for First Time In Frosh Vet Class

For the first time, the fall freshman veterinary class at Auburn has more women than men, part of a national trend the dean of the college attributes to the profession's good pay, hours, and working conditions. Of the 90 entering freshmen in this fall's class, 46, or 51 percent, were women.

"Women are coming into the national workforce in record numbers," said Dean J.T. Vaughan '55. "Today's top students are aiming for fields with equal opportunities for women, and veterinary medicine is such a field."

DEN OF DESIGN—Shunning the bright lights of such fashion centers as New York City, Kathy Baggett '88 prefers to develop her designs in her Huntsville apartment studio. Ms. Baggett recently won two awards in an international apparel design competition for a project she developed while at Auburn.

Thornton Becomes 1st Ala. Woman in Space

In November Kathryn Cordell Thornton '74 became the third Auburn graduate and first Alabama woman to fly in space when NASA shuttle mission STS-33 was launched. The only woman of the five-member crew, Dr. Thornton served as a mission specialist on the Department of Defense classified mission. It was the 32nd orbiter flight and the shuttle Discovery's ninth.

Dr. Thornton joins the ranks of Ken Mattingly '58 and Hank Hartsfield '54 as Auburn graduates who have flown in space. Among the 88-member NASA astronaut corps (those on active duty), there are four Auburn graduates: Dr. Thornton; Col. Hartsfield; Army Maj. Jim Voss '72; and Jan Davis '77, who is set to fly next June. Rear Admiral Mattingly flew in space three times before retiring from the astronaut corps in 1984.

Dr. Thornton didn't make her recent jaunt through space without a few Auburn mementos, including an AU license plate with her mission number on it.

John R. Boles is a teacher and lives in Madison with his wife, Yvonne.

Thomas M. Bailey is an architectural division manager with TMA, Inc., International in Marietta, Ga.

Former Tiger Pitcher Named AL Rookie of Year

Former Auburn pitcher Gregg Olson, who led Baltimore to one of the greatest turn-arounds in baseball history, was voted American League Rookie of the Year in early November. He received 26 first-place votes and two seconds from a 28-member panel of the Baseball Writers Association of America.

He set an AL rookie record with 27 saves, eight more than the rest of the AL rookies combined this year, stopping a three-year streak by Oakland and becoming the first relief pitcher to win the AL honor.

Known for one of the sharpest breaking curve balls in the majors, Olson didn't allow a run after July 31. In those 21 appearances, he gave up 11 hits and struck out 23 in 26 2/3 innings, getting 11 saves.

He was 5-2 overall with a 1.69 ERA and 27 saves in 33 chances. He struck out 90, walked 46, threw nine wild pitches, and gave up 57 hits in 85 innings. Opponents batted .188 against him and left-handers hit just .135, lowest in the majors. Baltimore finished the season with an 87-75 record, 33 more victories than in 1988.

UPCHURCH SCHOLARSHIP—Melanie C. Hardee, right, a freshman in animal and dairy science and pre-veterinary medicine, recently received the \$4,000 Samuel Earl Upchurch Endowed Scholarship in Agriculture and Agribusiness. Joy Jones Burnham is a graduate student at Jacksonville State University in guidance and counseling. She lives in Anniston with her husband, Patrick.

R. Coleman Foss is assistant administrator of Methodist Health Systems in Memphis.

400 IN A ROW—So you think you have Auburn spirit? Compare yourself with W.D. Powell of Birmingham, who on October 28 saw his 400th consecutive Auburn football game including all regular season and bowl games. He also saw all A-Day games during that time until 1985. Mr. Powell started seeing Auburn play on a regular basis in 1951 but missed the Georgia Tech game in 1953 when his flight was cancelled and he didn't have time to drive to the game. He has two children and a grandson who graduated from Auburn.

SAY BEAT BAMA—Alabama's first visit to Jordan-Hare Stadium for a varsity football game was an occasion to remember—especially for Tiger fans. The Auburn cheerleaders shown here were not the only ones trying to grab a little bit of history, as programs for the game sold out more than four hours before kickoff.

Gibson '82 Helps Identify 2nd Largest Crater in U.S.

John W. Gibson '82, an exploration geophysicist for Chevron USA in Houston, Tex., has helped solve a geologic mystery at a site known as Marquez Dome 25 miles west of Centerville, Tex.

Once thought to be a strange salt dome, Marquez Dome has now been identified as the second largest meteor crater in the United States, thought to have resulted from the impact 50 million years ago of a meteorite almost a half-mile in diameter. The consequent explosion was about equal to the simultaneous detonation of every nuclear weapon in the arsenals of both the U.S. and the Soviet Union and created a hole 12 miles across and 4,000 feet deep.

Mr. Gibson became familiar with Marquez Dome while performing his duties as an exploration geophysicist and set about to identify its origin with the help of V.L. Sharpton of the Lunar and Planetary Institute. No traces of the meteorite have been discovered as yet.

Wade B. Wilson is a project manager for Venture Construction in Greensboro, N.C., where he lives with his wife, **Suzanne Paramore**, a social worker for the Greensboro Hospital.

Ens. **Carl H. Bolter, III**, serves aboard

AUBURN FAMILY—Remember the bumper stickers that read, "My son (or daughter) and my money go to Auburn"? For Carolyn and Ted Jennings of Brewton, that's no joke. Pictured with their Auburn students (and oldest son Philip who's graduated), they joked about requesting donations. Pictured left to right are: David, a sophomore; Carolyn Jennings '63; Ted Jennings '65; Steve, a junior; Molly, a freshman; daughter-in-law Allison, a senior; and Philip '87.

—Photo by Mike Jernigan

WE'LL MISS YOU!—Geoff LoCicero, left, and Steven Stiefel joined the ranks of *Alumnews* alumni when they graduated on December 8, leaving us two staff writers short. Geoff technically left us the end of last quarter for a journalism internship in Birmingham, and is headed for Washington, D.C., for another internship with Scripps-Howard. Steve, whose last *Alumnews* feature appears in this issue, is a speech communications graduate with a passion for film production. Good luck, gentlemen!

Campbell Winner Of ACEP's First EMS Nat'l. Award

John E. Campbell '66, director of the emergency department at Boaz-Albertville Medical Center in Boaz, was honored in September with the American College of Emergency Physicians' first Emergency Medical Services (EMS) Award. The new award is presented to an individual who has made an outstanding contribution in the area of emergency medical services of national significance or application. Dr. Campbell, who has also received a special citation for outstanding leadership from the governor, authored the first basic trauma life support course taught to paramedics and advanced emergency medical technicians (EMTs). Written in 1982, this course is now used in training sessions around the world. He also authored the first training book for basic EMTs.

In addition to serving as president of Basic Trauma Life Support, an international organization for teaching prehospital trauma care, Dr. Campbell serves on the editorial board of the *Journal of Prehospital Care* and is a former state chapter president and board member of the American College of Emergency Physicians.

PRE-GAME CHAT—Alabama Head Coach Bill Curry, left, chats with Auburn boss Pat Dye prior to the kickoff of the first Tide-Tiger game ever played on the Auburn campus. The big game was the highlight of an entire weekend of festivities in town and on campus, including a "Beat Bama" parade and pep rally, a concert by the Drifters, and the first Auburn-UAB basketball game played on the Tigers' home court. Dye was the only one smiling after the game, as his Tigers scored a 30-20 win over the previously undefeated Crimson Tide.

Harrison Honored For Service to State of Alaska

The Alaska legislature recently recognized David C. Harrison '76 for his substantial contributions and service to the State of Alaska.

Since moving to Alaska in 1952 to work as a survey crew member for the Army Corps of Engineers projects at Elmendorf AFB and the Distant Early Warning Radar System at Point Barrow, Mr. Harrison has taught school in several rural districts, helped build the Trans-Alaska Pipeline, owned a hotel, and worked as a commercial fisherman.

He has also been an active member of the National Educational Association, the Parent-Teachers' Association, and the Alaska Chamber of Commerce. He was elected to the state senate in 1962, where he served on the State Affairs Committee and the Resources Committee while distinguishing himself through his work on behalf of Alaska's fishing industry.

Smith Returns to Birmingham as Appeals Judge

After more than 40 years in the Washington, D.C., area as a tax lawyer and federal judge, Edward Samuel Smith recently returned to Alabama as a member of the 12-judge U.S. Court of Appeals, a Washington-based regional appeals court with nationwide jurisdiction over specific types of appeals in highly technical cases such as disputes over patents, international trade, and veterans affairs.

A member of the class of 1940, Judge Smith received his law degree from the University of Virginia. Though he recently went on "senior status," his caseload is still second-largest among the judges in the federal circuit. Judge Smith also sits on panels for the 11th U.S. Circuit Court of Appeals based in Atlanta, one of 12 regional appeals courts with federal jurisdiction over appeals in criminal cases.

Alan Lewis is a procurement manager for American Wood Fibre and Capital Veneer Works in Montgomery. He and his wife, Roben, live in Wetumpka.

Wendy Foster is an assistant manager at The Gap in Macon, Ga.

Merrilyn Eastham Burt owns War Eagle Typing in Auburn. She and her husband, Larry, have two children, Samantha, 4, and Wesley, 3.

Susan Goldberg attends law school at Emory University and lives in Stone Mountain, Ga.

Pamela R. Hall is an interior designer with Anne Geary in Charlotte, N.C.

Mrs. **Timothy Wayne Wales** of Monroeville on Sept. 6.

CORRECTION:

MARRIED: Elise Henderson to **Ronald Winston (Jay) Sailors, Jr.**, '87 on July 22. Jay works for *The Montgomery Advertiser/Alabama Journal*.

In Memoriam

Compiled by Nelda Griffin

Boyd M. Philips '14 of Conyers, Ga., is deceased according to recent information. Survivors include his wife, Emma.

R. Henry Orr '20 of Fultondale is deceased according to recent information. Survivors include his wife, Violet.

Alvin A. Biggio '26 of Birmingham, an emeritus member of the board of the Auburn University Foundation, died Dec. 8 at the age of 85.

In addition to serving on the Foundation board, Mr. Biggio also held an honorary doctorate from Auburn and was a previous winner of the university's Algernon Sydney Sullivan Award for achievement in and support of the humanities. Biggio Street, a street on the Auburn campus, is named for him.

Prior to his retirement in 1969, Mr. Biggio was a senior vice president with Liberty National Life Insurance Company. He was also a past director of the Downtown Birmingham Kiwanis Club and past president of the Birmingham Monday Morning Quarterback Club.

He is survived by his wife, Mila.

Charles C. Bush '30 of Debary, Fla., died Aug. 27. Survivors include his wife.

William L. Gantt '30 of Deatsville died Nov. 11, 1988. Survivors include his wife, Dorothy.

Henry Cotton Lowe, Sr., '31 of Opelika, died July 8. He was a former Lee County Tax Commissioner and a veteran of World War II. Survivors include his wife, Inez; son, Henry C. Lowe, Jr., '70; and three grandchildren.

Winford P. Sitz '33 of Birmingham died in January. He is survived by his wife, Edith.

Frank S. Tennille, Jr., '34 died Oct. 6 at his home in Yorba Linda, Calif. He was a member of the original Auburn Knights Orchestra and fronted the Marine Corps Band in World War II. Prior to his retirement, he held positions in the marketing division of the North American Rockwell Corporation and the Textron Corporation. A former member of the Alabama Legislature, he is survived by his wife, Aileen, and four daughters: Toni Dragon '62, Jane, Louisa, and Melissa.

Braxton Bragg Pitts '36 of Pittsview died Nov. 3, 1988. He is survived by a sister, Edith.

Edward A. Von Gerichten '37 died July 17 at his home in Brightwaters, N.Y. He was a retired architect. He is survived by his wife, Arlene; two daughters, Arlene and Lynn; two sons, William and Edward; and seven grandchildren.

James W. Reeder '37 of Enterprise died May 15. He is survived by his wife, Kathryn.

Rufus A. Nettles '39 of Uvalde, Tex., died Sept. 15. Survivors include a brother, William D. Nettles '43.

Edward Francis Rehm '40 of Mobile died Aug. 15, 1987.

W.D. Debardeleben '43 of Lowndesboro died July 4. He is survived by his wife, Elsie.

Alan R. Barton '48 of Gulfport, Miss., died Oct. 7. He retired recently as president and CEO of Mississippi Power after a 41-year career with the Southern Electric System. Survivors include his wife, Sue; sons, Alan R. Barton, III, '77 and William; and daughters, Mary and Elizabeth.

Dr. **Jack Trice Jones, Jr.**, '43 of Tallahassee, Fla., died Oct. 26. He was a retired captain from the U.S. Medical Corps, having served in World War II, Korea, and Vietnam. He was married to the late Kathryn Kennedy '44. Survivors include his mother; sister, Nancy; two sons, Carl Jones '71 and Roger Jones '74; two daughters, Lenore and Jacqueline; and eight grandchildren.

Charles W. Sandlin, Jr., '44 of Fayetteville, Tenn., died Sept. 16. Survivors include his wife, Claudia; two daughters, Sherry and Michele; a son, Wesley; two stepdaughters, Sherrie and Terrie; a stepson, David; a sister, Myriam; a brother, Hershel; three grandchildren; and three stepgrandchildren.

Marjorie Prince MacKenzie '44 of Gainesville, Fla., has been deceased since 1986 according to recent information.

Katherine (Kay) Hall Plage '44 of Atlanta, Ga., died Oct. 8. She is survived by her husband, Bill.

Wiley Colon Allen '45 of Montgomery died Feb. 7. Survivors include his wife, Myrtle.

Arthur Hampton Coker, Jr., '46 of Tallassee died Aug. 23. He served many years as Director of Housing at Troy State University before his retirement in 1982.

Lt. Col. **Benjamin Eugene Bridges** '47 of Deatsville died March 20. He was retired from the Air Force. Survivors include his wife, Hannah; three daughters, Mrs. Cynthia Bell '68, Mrs. Anita Barrett '69, and Mrs. Barbara Cartright '81; and a brother, John S. Bridges '43.

Wyatt Hugh Thomas '48 of Shreveport, La., died Aug. 8. He is survived by his wife, Nan.

Paul Louis Patty '49 of Baton Rouge, La., died March 29. He is survived by his wife.

Margaretta Salata Reynolds '49 of Johnson City, Tenn., died Nov. 6, 1988. Survivors include her husband, Dr. Eugene M. Reynolds '49.

John D. Pegues '50 of Bessemer is deceased according to recent information. He is survived by his wife, Katherine.

Carey Thurman Waldrop '50 is deceased according to recent information. He is survived by his wife, Bobbye.

Edgar Hamlett Simmons '51 of Kingwood, Tex., died Sept. 21.

Archie Vineyard Osborn '51 of Killen died May 5. She is survived by her husband, Robert J. Osborn '50.

R. Brandon Crawford '52 of Birmingham died Sept. 26. He began his architectural practice as a partner in the firm of Fuller and Crawford, Architects. In 1966 he formed **Brandon Crawford and Associates, Architects, Inc.**, serving as president until 1980, when the firm of Crawford, McWilliams, Hatcher, Architects, Inc., was formed. Survivors include two daughters, Dawn and Miriam.

James L. Stanford, Jr., '53 of Demopolis has been deceased since 1987 according to recent information. Survivors include a son, Jimmy.

John Percy Suttle '54 of Centreville died March 5. He is survived by wife, Merita.

Jewel Thomaston Browning '58 of Dadeville died July 21, 1987. A retired school teacher, she is survived by two sons, Tommie and Norman.

Thomas G. Nunn '60 of Wadley died Feb. 2. Survivors include his wife, Agnes.

Arthur Edward Barbay '63 of Columbus, Ga., died Jan. 20. Survivors include his father, Edward.

Jackson Monroe Smith '69 of Pensacola, Fla., died in 1987 according to recent information. Survivors include his mother, Jewel.

Dr. **William S. Casey** '76 of Prospect, Ky., is deceased according to recent information. He is survived by his wife, Lurena Page Casey '76.

Margaret Sykes McDowell '76 of Enterprise died Sept. 26. She is survived by her husband, Houston Carl McDowell '74; parents; one sister, Sharman; two brothers, Wayne and Carl; and her grandfather.

James J. McWilliams '76 of Frisco City, died July 7. He is survived by his mother, Mary Agnes.

Susan Windsor Stockley '79 of Memphis, Tenn., died June 30. She is survived by a sister, Cary.

Lt. **Douglass Glen Gray** '85 died Oct. 4. He was a Naval aviator based in Jacksonville, Fla. Survivors include his wife, Stacy; his father, William L. Gray '70; his mother, Lillie; and a brother, David.

Daniel Thomas Shields '88 of Doraville, Ga., died June 17. Survivors include his mother, Marilyn.

SUPERIOR SERVICE—S. Rod Jenkins, right, associate professor of civil engineering at Auburn, recently received the Auburn Engineering Superior Service Award for his outstanding educational, professional, and civic contributions. Presenting the award was Sabert Oglesby, Jr., '43, awards chairman of the Auburn Alumni Engineering Council and president emeritus of the Southern Research Institute.

SPORTS

Tigers Finish a 9-2 Regular Season With 30-20 Win Over Ebbing Tide

After struggling to a 5-2 record as they rounded "Amen Corner," Coach Pat Dye's Tigers finished the season with wins over Florida, Louisiana Tech, Georgia, and Alabama to put the finishing touches on a 9-2 regular season, a share of their third consecutive SEC title, and a Hall of Fame Bowl date with Big Ten Conference runner-up Ohio State.

The Tigers' late-season surge began against Florida, when in one of the most exciting finishes in Jordan-Hare Stadium's 50-year history, Tiger quarterback Reggie Slack hit wideout Shayne Wasden in the corner of the endzone to cap a gut-wrenching 10-7 win over the Gators. Slack's 25-yard pass, which came on fourth and 11 with only 26 seconds showing on the clock, kept the Tigers' hopes alive in the SEC title race.

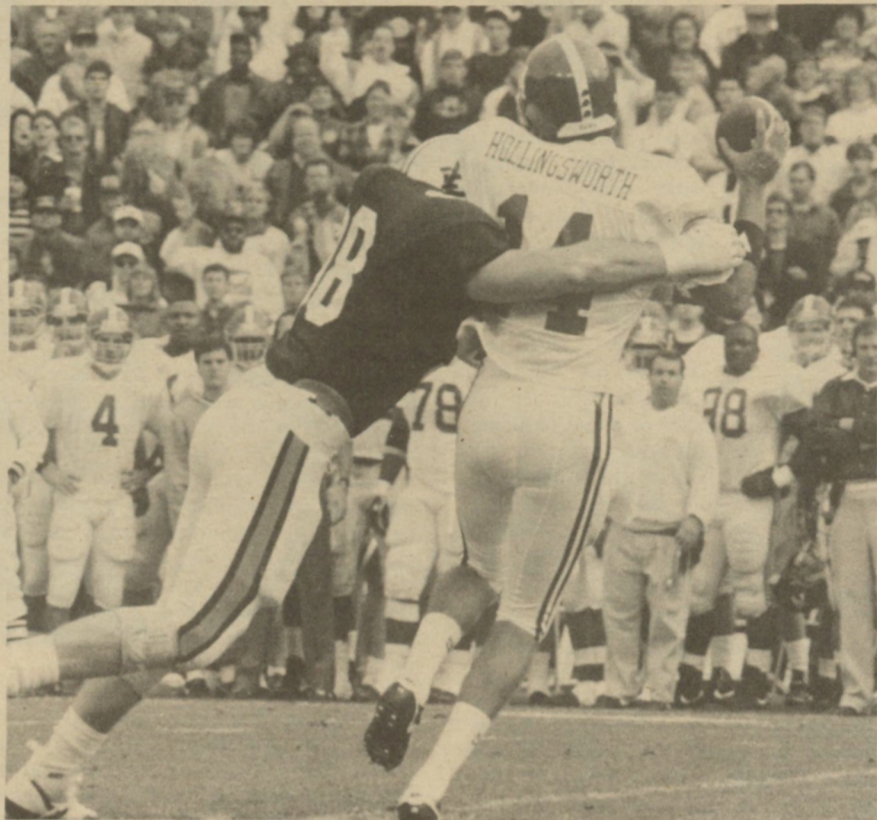

Florida had built a 7-0 first-half lead after the Gators recovered a Slack fumble on the Auburn five early in the opening quarter. Tailback and Heisman Trophy candidate Emmitt Smith took it in from there for Florida, but the Tiger defense would allow the Gators close no more. Auburn closed the gap to 7-3 in the third quarter, courtesy of a 47-yard Win Lyle field goal that bounced up and over the crossbar. A second Lyle field goal attempt was blocked with under six minutes to play, but the Tiger defense forced a Gator punt and the offense began its winning drive with 3:56 to play.

For the game, Auburn's ever-improving defense held Florida to 211 yards rushing and only six through the air, while limiting Smith to 86 yards on 27 carries.

The Tigers' 38-23 victory over Louisiana Tech the following week was as listless as the Florida game was exciting. The Tigers trailed 10-7 after one quarter before a flurry of Tech mistakes enabled the opportunistic Auburn offense to build a 35-10 halftime lead. After free safety John Wiley recovered a Tech fumble early in the second quarter in Bulldog territory, freshman tailback Darrell "Lectron" Williams went 36 yards for the go-ahead score. Less than two minutes later, Slack hit wide receiver Alexander Wright on a 37-yard scoring pass, then the Tigers cashed in on a fumble and an interception to add two more first-half scores via a 14-yard Wright run on a reverse and a 15-yard scamper by Williams.

The second half belonged to Tech, as the Bulldogs outscored Auburn 13 to 3. The Tigers' only points came from a 35-yard Lyle field goal, while Tech added a pair of field goals and a seven-yard scoring pass—the first touchdown pass the Tiger defense had surrendered all season.

Despite the lethargic performance against Tech, both Auburn's offense and

SACK ATTACK—Tiger defensive lineman Mike Campbell records a sack against Alabama quarterback Gary Hollingsworth in the first period of Auburn's 30-20 win over the Crimson Tide. Hollingsworth suffered three sacks at the hands of the Auburn defense, for 20 yards in losses.
—Photo by AU Photo Services

defense woke up the following week to post the Tigers' third straight victory over Georgia—a 20-3 win between the hedges in Athens. Offensively, the Tigers moved the ball almost at will, rolling up 230 yards through the air and 238 on the ground. Williams, subbing for an injured James Joseph at the tailback spot, led the Tiger ground assault with 128 yards on 26 carries and one touchdown.

After a 32-yard, first-quarter Lyle field goal gave the Tigers a 3-0 lead, Auburn proceeded to put the game away in the second quarter with a pair of 80-yard scoring drives. Slack capped the first march with a 24-yard scoring pass to wideout Greg Taylor, while Williams put the finishing touches on the second with a one-yard plunge off tackle. With the defense stuffing the Bulldogs at every turn, Auburn's 17-0 halftime lead was more than enough to seal the Tiger win. The two teams exchanged field goals in the second half, leading to the final 20-3 margin.

Georgia tailback Rodney Hampton, second in the SEC in yardage gained only to Florida's Emmitt Smith, was held to only 29 yards on 10 carries, his poorest outing of the season. With Hampton corralled, the Dawgs were held to only 221 total yards, 173 of which came through the air. The win—Auburn's fourth in a row in Sanford Stadium—also marked the first time a Georgia team had been held without a touchdown since the 1977 season.

The resurgence of the Tiger offense could not have come at a worse time for Coach Bill Curry's Crimson Tide, which arrived in Auburn for the first Tiger-Tide game on the plains with a

perfect 10-0 record, a number two national ranking, and visions of a national championship matchup against Miami in the Sugar Bowl. The Tide left Jordan-Hare Stadium with a 10-1 record, a bitter taste to their Sugar Bowl invite, and a healthy respect for Tiger quarterback Slack and wide receiver Wright.

Much to the delight of most of those in a state-record crowd of 85,319, the Tigers scored on their opening possession, with a 44-yard Slack to Wright pass doing most of the damage in a 7-play,

68-yard drive. Tailback Joseph went over the top from one yard out to put the Tigers up 7-0 only three minutes into the contest. Alabama closed to within 7-3 on a 24-yard field goal following a Tiger fumble later in the opening quarter, then took a 10-7 lead just before the half with a 12-play, 63-yard drive after intercepting a tipped Slack pass.

The second half was almost all Auburn, though the Tide mounted a fourth quarter comeback that temporarily put a hold on the Tigers' victory celebration. After the Tide missed on a 48-yard field goal attempt early in the third period, Slack found wideout Shayne Wasden wide open for a 59-yard pass play carrying to the Tide 11. Once again, Joseph capped the 70-yard, 6-play scoring march with a one-yard leap, giving the Tigers a 14-10 lead they would not relinquish. A 60-yard Slack-to-Wright bomb set up a Lyle field goal later in the quarter, then the Tigers ran the lead to 24-10 early in the fourth when tailback Williams ended an 80-yard, 13-play drive with a 12-yard scoring run. Auburn pushed the lead to 27-10 before two late Tide scores cut the margin to 27-20, but the Tigers recovered an Alabama onside kick with 1:32 remaining. The Tide defense was unable to hold, and Lyle's third field goal of the afternoon ran the final margin to 30-20 and the biggest celebration ever to hit the plains at last got underway.

Slack finished the game with one of his finest performances as the Tigers' quarterback, completing 14 of 26 passes for 274 yards. Wright, named the Player of the Game by CBS, was on the receiving end of seven of Slack's passes for 141 yards. The Tiger defense also enjoyed another fine effort, holding the Tide's vaunted running attack to only 87 yards—117 below Alabama's season average.

LIFTOFF!—Tiger tailback James Joseph goes airborne to score the first Auburn touchdown of the day in the Tigers' 30-20 win over cross-state rival Alabama. Joseph only carried nine times for 17 yards in the contest, but two of his carries resulted in touchdowns as Auburn rolled up more than 440 yards in total offense.

Eagles' Young Tigers Off to A Rocky Start

Start with one of the toughest schedules in the nation, mix in four new starters with six career starts among them prior to this season, and add in the difficulties of adapting to a new coach and a new system, and you have the potential for a very tough season—which is exactly what first-year basketball coach Tommy Joe Eagles' young Tigers are going through.

Auburn opened the season with five straight losses, including three in the Great Alaska Shootout to Michigan State, Connecticut, and host Alaska-Anchorage. Senior guard Derrick Dennison scored 52 points in the three losses, and was named the Tigers' sole representative on the All-Tournament Team.

The Tigers then returned home to drop a close decision to UAB, before falling to Florida State in Tallahassee. Auburn's first win of the season came against Duquesne (79-74) in Birmingham, and the Tigers stretched their short winning streak to two with a 98-79 conquest of Alabama State Dec. 11.

Redshirt freshman guard Ronnie Battle has been the Tigers' bright spot so far, averaging almost 20 points per contest. Fellow freshman Reggie Gallon has also played well at a guard spot, chipping in 12 points per game. Sophomore Chris Brandt, alternating between the forward and center positions, has added some inside punch with 15 points and 9 rebounds per game.

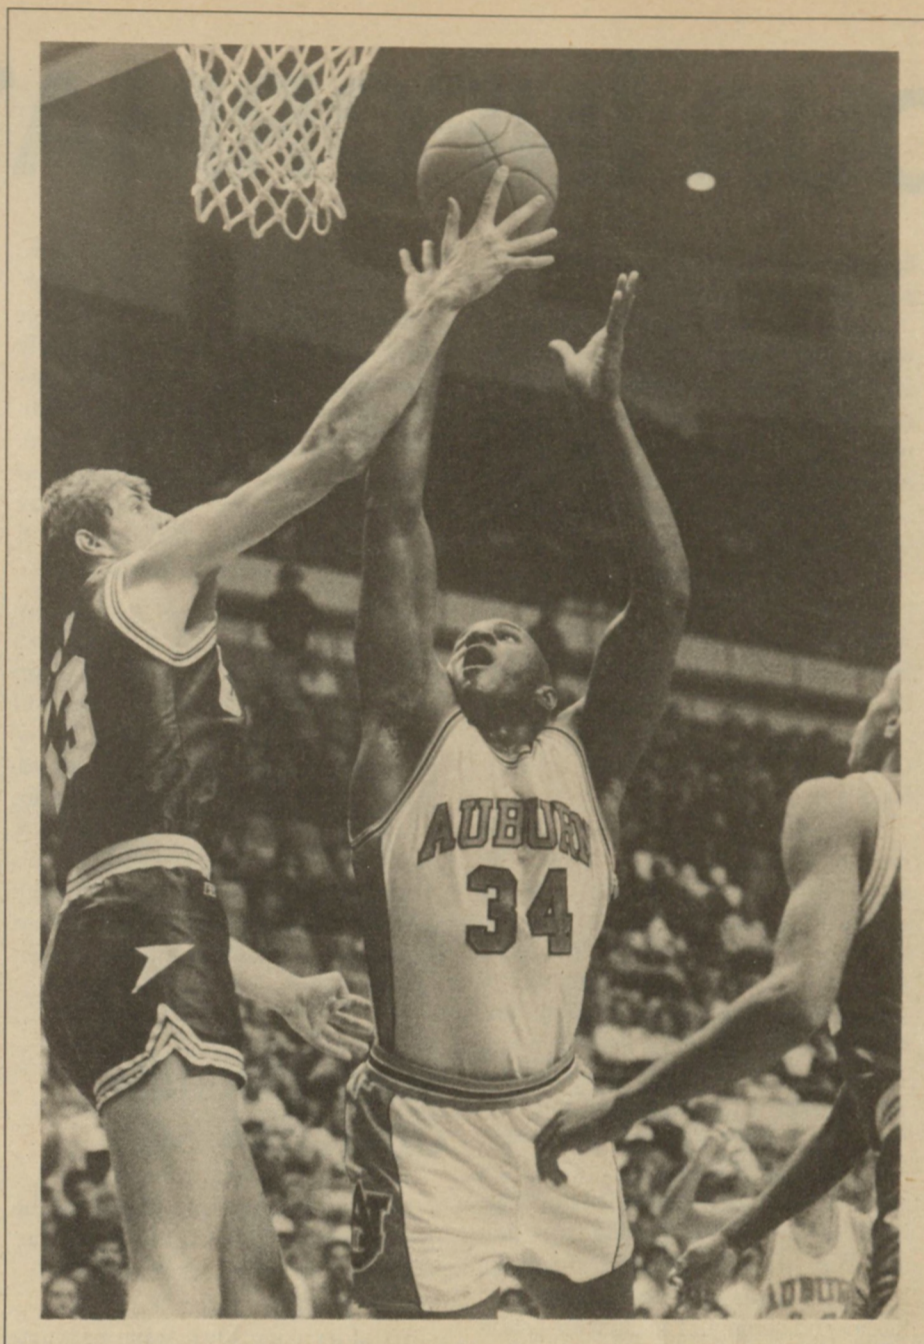

Coach Joe Ciampi's seventh-ranked Lady Tigers have fared much better, although their 48-game regular season winning streak came to an end against Purdue Dec. 7. At presstime, the Lady Tigers were off to a 4-1 start, with wins over Eastern Kentucky, Oregon, South Carolina, and Illinois in addition to their lone loss.

Eagles Signs Four, Ciampi Three In Early Signing

Tiger men's basketball coach Tommy Joe Eagles and his staff signed four newcomers for the 1990-91 season while Joe Ciampi and his assistants inked three prospective Lady Tigers to scholarships during the one-week early signing period in November.

Long on guards but short on size, Coach Eagles signed four inside players including one of Alabama's top prep stars and three of the top players in Georgia. Signing to play for Coach Eagles next season were 6-8 forward Jeffrey Belmer of Fitzgerald, Ga., 6-8 forward Cameron Boozer of Lanett, 6-8 forward Robert Shannon of Jackson, Ga., and 6-5 center Aaron Swinson of Brunswick, Ga.

Belmer averaged 14 points and 14.5 rebounds during his junior year and is listed by several recruiting services as among the nation's top 50 high school players. Boozer, a four-year starter for Lanett High, averaged 26 points and 12 rebounds last season. Shannon is ranked

UP FOR TWO—Auburn center Robert McKie works inside against UAB's Alan Ogg during the Tigers' loss to the Blazers. McKie, who was diagnosed shortly after the game to be suffering from tendonitis in his knees, will miss a minimum of four to six weeks and may be out for the remainder of the season.

—Photo by AU Photo Services

among the nation's top 100 players by All-Star Sports, with an average of 21.8 points and 8 rebounds as a junior. And Swinson, a top 50 All-Star Sports pick, averaged 19.3 points and 12.4 rebounds last year.

The soon-to-be Lady Tigers include 5-9 guard Kim Mays of Barbourville, Ky., 6-3 forward Bonita McFarland of Montgomery, and 6-3 center Joy Berry of Savannah, Ga.

Mays averaged 28 points and eight rebounds as a junior and is listed among the top 10 high school prospects nationally by a number of recruiting services. McFarland averaged 10 points and 10 rebounds last season and is projected as a force on the inside by Lady Tiger coaches. Berry averaged 12 points, 10.6 rebounds, and three blocked shots in her junior season.

Auburn Track's Rosen to Coach U.S. Olympic Team

Mel Rosen, now in his 27th season as Auburn's track coach, has been selected as head coach of the U.S. men's track and field team in the 1992 Olympics. Rosen was elected by the Interna-

tional Competition Committee of The Athletics Congress (TAC) along with Barbara Kacket of Prairie View A&M, who will coach the women's team.

"It's a dream come true," Coach Rosen said of the honor. "As a coach, one of your goals in life is to be on the Olympic staff. I reached one of my goals by being on the staff in 1984, but this surpasses that."

In the 1984 Los Angeles Games, Coach Rosen was an assistant handling the sprinters, hurdlers, and relay teams. His athletes won 13 medals, including seven golds, and set one world record. He also served as men's head coach for the 1987 U.S. World Championship team and is chairman of TAC's prestigious Men's Track and Field Committee.

Coach Rosen was named Southeastern Conference Coach of the Year and NCAA Coach of the Year in 1978 in both indoor and outdoor competition after he coached Auburn to a second-place finish in both the NCAA indoor and outdoor championships. He also repeated as NCAA Indoor Coach of the Year in 1980 and SEC Coach of the Year in 1985. Coach Rosen has coached more than 125 All-American athletes, including 62 SEC outdoor and 58 conference indoor champions. His dual meet record is 92-27.

Huntley Family & Auburn Form a Tiger Tradition

By Leslie Gingles Hirsch '84
AU News Bureau

When Doug Huntley '89 graduated from Auburn on Dec. 8, he carved out a spot in Tiger sports history, with help from his brothers. The Huntley brothers—Willie, Alex, and now Doug—share eight athletic letters, the most from a single family in Auburn's recorded sports history. Athletes earn a letter for each year of play on a varsity team.

Doug, former cornerback for the Tiger football team, says he comes from a family of seven brothers and sisters who love family traditions, and he recently continued one by becoming the fifth Huntley sibling and third Huntley athlete to graduate from Auburn.

Brother Willie '80, an assistant U.S. attorney for the Southern District of Alabama, lettered in football from 1977 to 1980, while brother Alex '88 ran track for Auburn on scholarship from 1986 to 1988. Another brother, Tony '85, was a cheerleader for Auburn from 1981 to 1984. Doug, who majored in criminology, says, "I'm the last of the Mohicans. My graduation was a very big event for the family."

The Huntley tradition of attending Auburn was started in 1973 by his sister, Debra '77, who was followed respectively by Willie, Tony, Alex, and Doug. The other two Huntley children, Wanda and Dennis, attended other universities, but the entire family shares a love of Auburn and Tiger football, Doug says.

The Huntleys, who range in age from 22 to 35, grew up in Tuskegee until their mother, Ada, moved to Montgomery, where all seven Huntley children graduated from Jefferson Davis High School. Mrs. Huntley now lives in Mobile, where "she continues to be my biggest fan," according to Doug. "I could always count on Mom being at all my games. On or off the field, she always supported me."

Doug completed his playing eligibility last fall and has joined the new International Football League, which began fall training Dec. 6. Some might consider his 5-foot-8-inch frame an obstacle, but Doug says he likes the physical challenge of playing football. "I've liked the thrill of football since the fifth grade. The first time I touched the ball in a game, I scored a touchdown. But I do have a hidden weapon. I surround myself with the biggest players possible on my side, so I can hit rather than be hit."

His favorite memory of Auburn surrounds his family, Doug says. "At the Sugar Bowl two years ago, my whole family came to the game. For the first time, they all saw me play." He adds that his next favorite memory is his Dec. 8 graduation, when his entire family gathered again to watch the final Huntley graduate.

"Even though we're spread from Texas to Mobile, we're still a close-knit family, constantly talking to each other," Doug says. "Nothing's really changed since we were little kids, except now we have to dial '1' before we call."

FOR YOUR INFORMATION

Missing Alum is Safe and Sound

In our November-December issue, we relayed a request for help in locating alumnus Don Dunson '65 of Pensacola, Fla., who disappeared while working late at his window and screen shop on Aug. 28. Friends and concerned alumni will be relieved to find out that Mr. Dunson has since been located, alive and well, in Texas.

According to a family friend, Mr. Dunson's disappearance was caused by "a stress-induced blackout," and he is apparently suffering from partial amnesia. He is receiving medical care, and may be able to return home shortly.

War Eagle Travelers Ready to Debark on Seven Trips in 1990

Auburn's War Eagle Travelers have an exciting 1990 in store with seven trips scheduled, ranging from exotic voyages to the lands of the pharaohs and the czars to a spring coach tour up the east coast to Washington, D.C.

The Travelers' first trip, the Egypt-Legends of the Nile excursion Feb. 8-19, will take participants to Abu Simbel, Alexandria, Aswan, Edfu, Esna, Luxor, Memphis, and Cairo. The trip includes a five-day Nile River cruise aboard a Presidential Line cruise vessel, as well as excursions to the Pyramids, Sphinx,

Egyptian Museum, Valley of the Kings, and Aswan High Dam.

Next, it's off to the lands down under with a Feb. 28-Mar. 19 trip to Australia and New Zealand. Stops in New Zealand include Auckland, Mount Cook, Queenstown, and Christchurch, while the Australian ports-of-call will be Sydney and Cairns, jumping-off point for viewing of the Great Barrier Reef.

A southern Caribbean cruise is the year's third adventure, March 24-31. After departure from San Juan, Puerto Rico, destinations for the Regency Cruise Lines' cruise ship *Regent Sun* include Grenada, Barbados, Martinique, Marie-Galante, and St. Thomas in the U.S. Virgin Islands.

For those who prefer their travels remain a little closer to home, the travelers program is offering a spring coach trip departing from Auburn for Savannah, Charleston, and Washington, D.C., Apr. 28-Mar. 6. In addition to sightseeing in historic Savannah and Charleston, the group's four-night stay in Washington will include attending a performance at the Kennedy Center.

June 4-17, the War Eagle Travelers will return to the USSR for a second straight year on the Golden Passage of the Czars trip. Much of the voyage—which includes stops in Moscow, Kanlinin, Uglich, Yaroslavl, Kostroma, Gorky, Kazan, and Leningrad along with a short stay in West Berlin, will be via the scenic Volga River aboard the river cruise ship *Sergei Esenin*.

Europe will again be the travelers' destination June 22-July 4 for the Romance of the Seine trip. Participants

will spend three nights in London before traveling cross-channel to Honfleur, France, to board the brand new river cruise ship *Normandie* for a leisurely cruise up the Seine River to Paris. Stops along the way include Villequier, Caudebec, Rouen, Les Andelys, and Vernon, along with a one-day side excursion to Bayeux, Caen, and the Normandy beaches, sight of the allied invasion of Nazi-occupied Europe in World War II.

Ending up the travelers' 1990 adventures will be a July 14-26 trip to Alaska via the Midnight Sun Express. The trip begins in Fairbanks, where travelers will board the Midnight Sun Express, one of the most luxurious trains in the world. Denali National Park and Anchorage are the train's stops, then it's all aboard the cruise ship *Pacific Princess* of television's "Love Boat" fame for a cruise through the Inside Passage with stops at Skagway, Juneau, Ketchikan, and Vancouver, Canada.

Aubie Calendar Offered by SGA

Auburn's coolest cat is back in the form of the 1990 Aubie calendar, featuring Tiger fans' favorite feline in a variety of campus poses.

To order your 1990 Aubie calendar, send \$4, plus \$1.50 postage and handling to: Aubie Calendar, Student Government Association, 332 Foy Union, Auburn University, AL 36849-5134, or call the SGA Office at (205) 844-4240.

Library Carrels Available for Donor Naming

Opportunities to name library carrels for someone in your family or a friend or teacher are still available, although no more study rooms are available. More than 200 carrels are still available for naming when the addition and renovation of Ralph Brown Draughon Library is complete in 1990.

Carrels are available for naming for gifts of \$1,000 to the library.

Gifts may be made immediately or over a five-year period. Once the pledge is complete, a plaque will be placed on the carrel door commemorating the gift and listing the name of the person honored. The program, which could raise \$450,000 for the library, is on a first-come, first-serve basis.

To date, 77 carrels and all 20 study rooms have been reserved by gifts or pledges. Checks reserving a carrel should be made payable to the Auburn University Foundation.

Additional information about the carrels is available in a brochure or by phone. Should you wish more information about the carrel-naming program, please write Kaye Lovvorn, Auburn University Office of Alumni & Development, 317 S. College Street, Auburn University, AL 36849, or call her at (205) 844-1166. #8923

Engineering Seeks Candidates for '90 Honor Awards

The College of Engineering is currently seeking nominations for its annual engineering honors awards, according to Sabert Oglesby chairman of the awards committee for the Alumni Engineering Council.

The Council is seeking help in identifying candidates for four awards, including the Gilmer Award, the Distinguished Engineer Award, the Engineering Achievement Award, and the Engineering Superior Service Award. Eligibility criteria for each award are different. Anyone may make a nomination, and nominations remain active indefinitely.

Nomination applications for each award are available through the Alumni Engineering Council secretary, Dr. E.O. Jones, at 108 Ramsay Hall, Auburn University, AL 36849-5330. Fall quarter is the best time to submit nominations, as the awards committee meets during

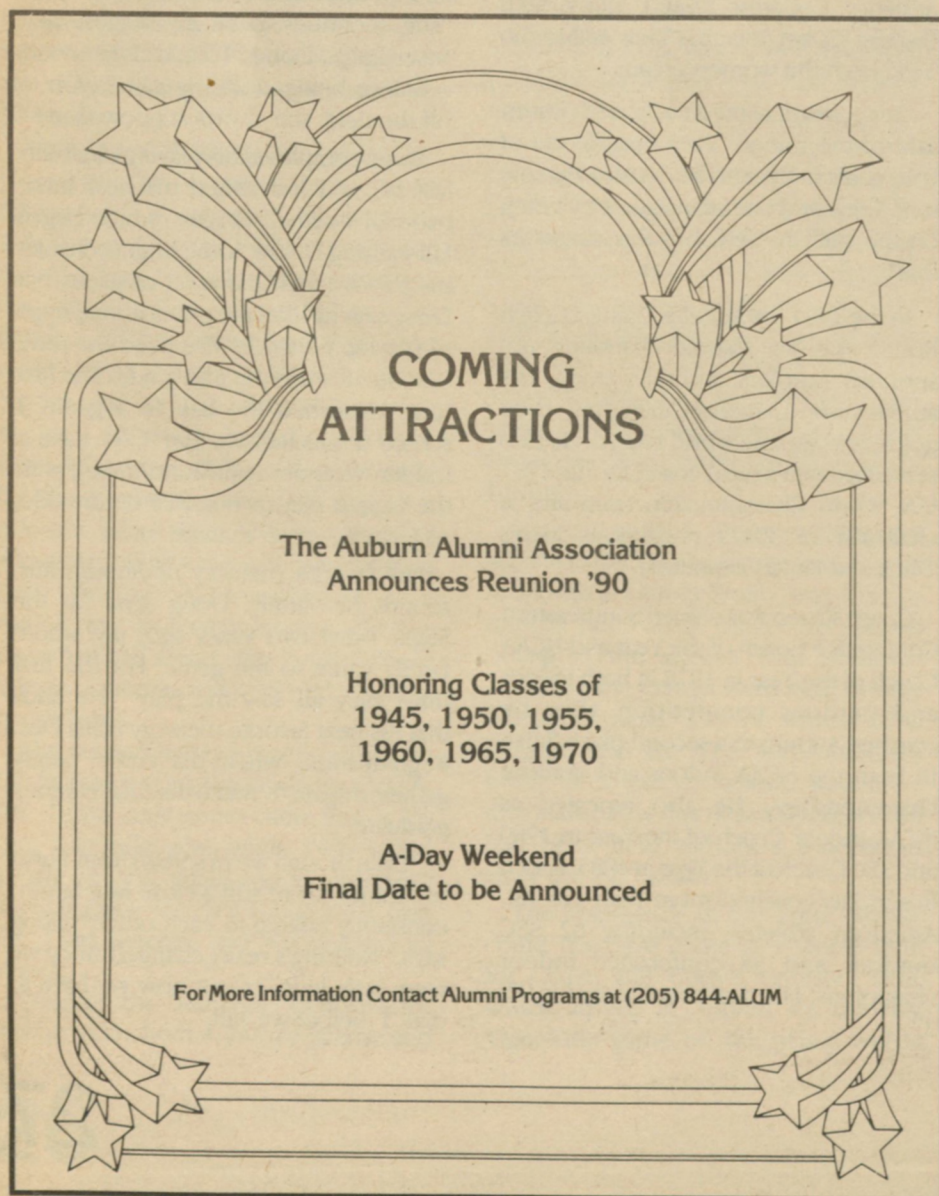

Photos Available From First Bama Visit to Plains

A number of photos from Alabama's historic first visit to the plains for the Auburn-Alabama football game are available for purchase from Auburn University Photographic Services.

Among the shots available are an aerial view of the stadium, pre-game shots of the coaches and mascots, and post-game photos of the scoreboard. A collage depicting the scoreboards of the last four Auburn-Alabama games—all Tiger victories—is also available.

For more information, write University Photo Services, L Building, Auburn University, AL 36849, or call (205) 844-4560.
